City of Elk Grove Investment Pool

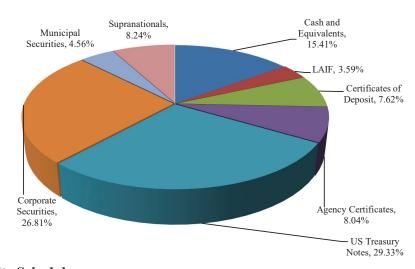

For the Quarter Ending - DECEMBER 31, 2022

INVESTMENT POLICY SUMMARY

The funds are invested pursuant to the objectives and requirements set forth in the City's investment policy. The City of Elk Grove's investment policy has three objectives: (1) safety of principal is the foremost objective of the investment program. Investments of the City shall be undertaken in a manner which seeks to ensure the preservation of principal in the overall portfolio (2) the City's investment portfolio shall remain sufficiently liquid to enable the City to meet all operating requirements which might be reasonably anticipated. This goal shall be achieved by maintaining a prudent portion of the City's portfolio in liquid, short-term instruments which can readily be converted to cash if necessary, and (3) the City's investment portfolio shall be designed with the objective of attaining a sound rate of return throughout budgetary and economic cycles, commensurate with the City's investment risk constraints and the cash flow characteristics of the portfolio. In accordance with California Government Code Section 53607, the Elk Grove City Council has authorized the City Treasurer to invest on behalf of the City, to manage the City's investment program consistent with this investment policy, and to maintain a system of internal controls to regulate the activities of subordinate officials. It is the City's full intent, at the time of purchase, to hold all investments until maturity to ensure the return of all invested principal dollars. However, it is realized that market prices of securities will vary depending on economic and interest rate conditions at any point in time. It is further recognized, that in a well diversified investment portfolio, occasional measured losses are inevitable due to economic, bond market or individual security credit analysis. These occasional losses must be considered within the context of the overall investment program objectives and the resultant long term rate-of-return.

CERTIFICATION

The City of Elk Grove's Investment Policy reads in part:

The City of Elk Grove's investment policy has three objectives (1) protect principal, (2) provide for liquidity needs, and (3) obtain the most reasonable rate of return possible within the first two objectives.

It is the City's full intent, at the time of purchase, to hold all investments until maturity to ensure the return of all invested principal dollars. However, it is realized that market prices of securities will vary depending on economic and interest rate conditions at any point in time. It is further recognized, that in a well diversified investment portfolio, occasional measured losses are inevitable due to economic, bond market or individual security credit analysis. These occasional losses must be considered within the context of the overall investment program objectives and the resultant long term rate-of-return.

Economic Update

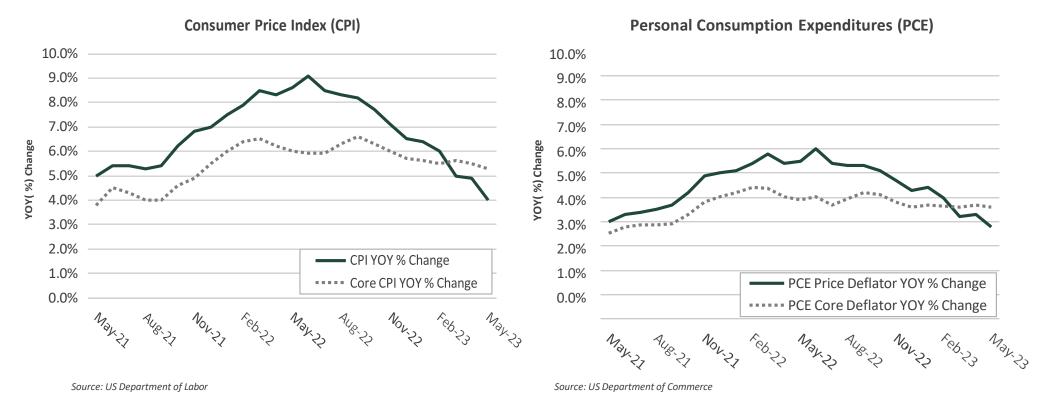

- Recent economic data continues to suggest positive but below trend growth this year. Although the pace of job growth is moderating, labor markets remain solid, and the U.S. consumer has demonstrated resiliency. Inflationary trends are subsiding, but core levels remain well above the Fed's target. Given the cumulative effects of restrictive monetary policy and tighter financial conditions, we believe the economy will gradually soften and the Fed will remain data dependent as they tread cautiously going forward.
- At the June meeting, the Federal Open Market Committee paused in their rate hiking campaign after ten straight rate increases and left the target Federal Funds rate in the current range of 5.00 5.25%. Market participants viewed the FOMC's decision as a 'hawkish' pause, expecting further tightening in the future, primarily based on the updated release of the FOMC's Summary of Economic Projections (SEP) forecast which reflected a stronger economic outlook and higher rates compared to the March forecast. We believe the resiliency of future economic data will determine if the Federal Reserve can stay on hold for a period of time or will be forced to tighten policy further to bring inflation back down towards their 2% policy objective.
- The yield curve remained inverted in June. The 2-year Treasury yield surged 50 basis points to 4.90%, the 5-year Treasury yield rose 40 basis points to 4.16%, and the 10-year Treasury yield increased 19 basis points to 3.84%. The inversion between the 2-year Treasury yield and 10-year Treasury yield widened to -106 basis points at June month-end versus -76 basis points at May month-end. The spread between the 2-year Treasury and 10-year Treasury yield one year ago was +6 basis points. The inversion between 3-month and 10-year Treasuries narrowed to -146 basis points in June from -176 basis points in May. The shape of the yield curve indicates that the probability of recession is increasing.

Employment

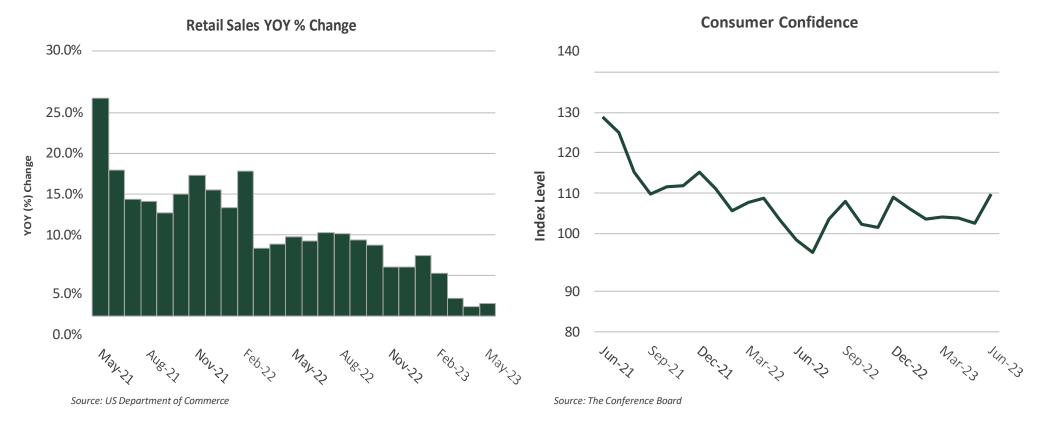

The U.S. economy added 209,000 jobs in June, falling short of consensus expectations, and the last two months were revised downward by 110,000 jobs. Although decelerating, the pace of job growth remains healthy with the three-month moving average payrolls at 244,000 and the six-month moving average at 278,000. The unemployment rate declined to 3.6% in June from 3.7% in May, while the labor force participation rate remained at 62.6%. The U-6 underemployment rate, which includes those who are marginally attached to the labor force and employed part time for economic reasons, increased to 6.9% from the prior month at 6.7%. Average hourly earnings remained at 4.4% year-over-year in June, unchanged from an upwardly revised 4.4% increase in May. While the longer-term trend of hiring is slowing, levels remain consistent with a solid labor market.

Inflation

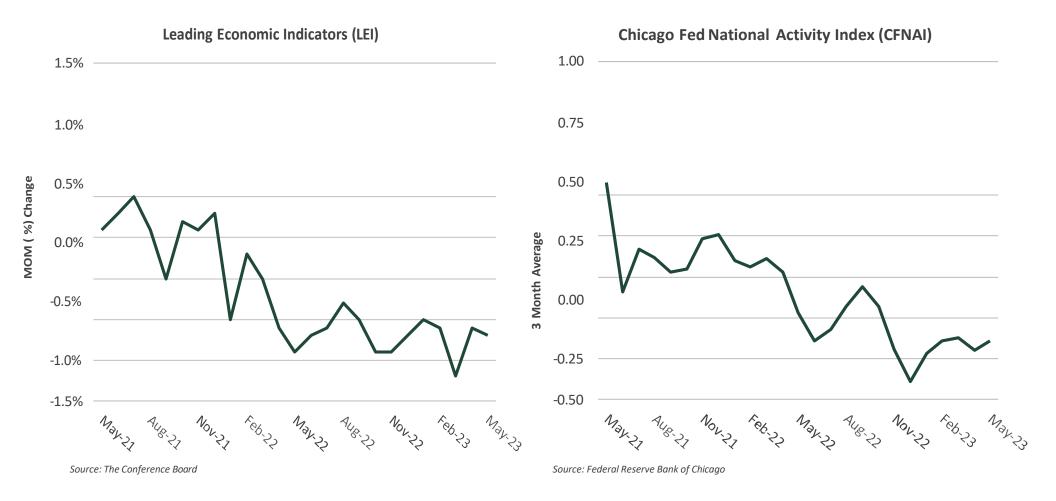

The Consumer Price Index (CPI) increased in May by 0.1% month-over-month and 4.0% year-over-year, down from 4.9% in April. The Core CPI, which excludes volatile food and energy components, remained firm at 0.4% month-over-month and 5.3% year-over-year, decelerating modestly from 5.5% in April. The Personal Consumption Expenditures (PCE) index rose 3.8% year-over-year in May, down from a 4.3% gain in April. Core PCE, the Federal Reserve's preferred inflation gauge, increased 4.6% year-over-year in May, down slightly from a 4.7% increase in April. Core inflation remains stubbornly elevated above the Fed's 2% target, with service-sector inflation and strong wage growth as headwinds.

Consumer

Advance Retail Sales rose 0.3% month-over-month in May, beating expectations but slowing from a 0.4% increase in April. Gains were broad-based and translated to a year-over-year increase of 1.5% in May versus a downwardly revised 1.2% increase in April. The Conference Board's Consumer Confidence Index surged to a better than expected 109.7 in June from 102.5 in May. Both current conditions and future expectations gained strength.

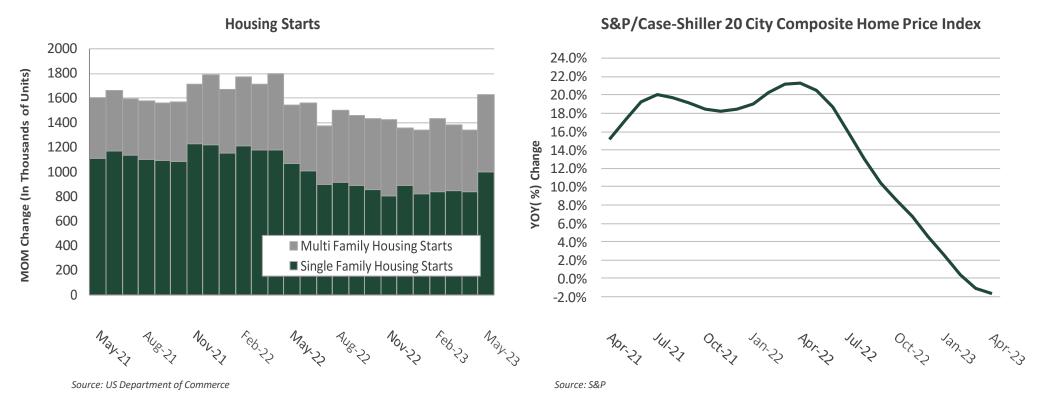

Economic Activity

The Conference Board's Leading Economic Index (LEI) remained in negative territory for the fourteenth consecutive month at -0.7% in May, versus –0.6% in April and was down 7.9% year-over-year in May. The consistent decline month-over-month continues to signal future contraction in the economy. The Chicago Fed National Activity Index (CFNAI) fell to -0.15 in May from 0.14 in April. On a 3-month moving average basis,

the CENAL remained negative at -0.14 in May, indicating a rate of growth below the historical average trend.

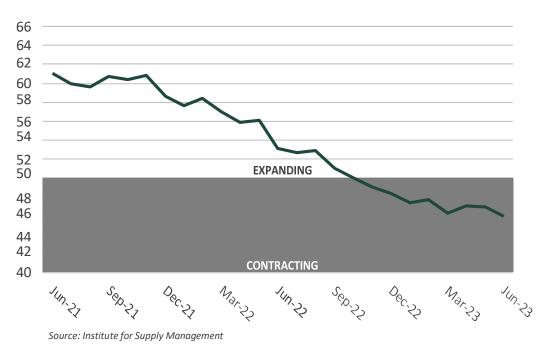

Housing

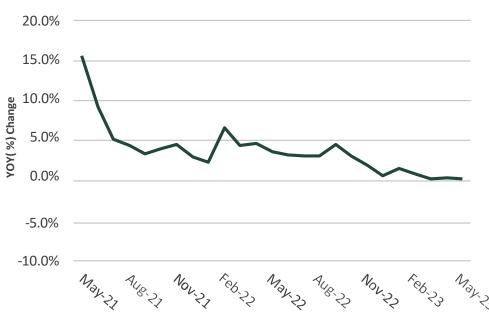

Total housing starts rose 21.7% month-over-month in May to 1,631,000 units from a downwardly revised 1,340,000 in April and were up 5.7% compared to May 2022. Both single-family and multi-family construction increased as expectations for lower rates and greater availability of construction labor and materials drove the surge in starts. The 30-year fixed rate mortgage stabilized at an average of approximately 6.7% at June month-end according to Freddie Mac. According to the Case-Shiller 20-City Home Price Index, housing prices dropped 1.7% in April after falling 1.1% in March, clearly displaying the impact of higher mortgage rates year-over-year, which have reduced demand for homebuying as affordability has declined. The Southeast remains the strongest region, while the West continues to be the weakest.

Manufacturing

Institute of Supply Management Purchasing Manager Index

Industrial Production

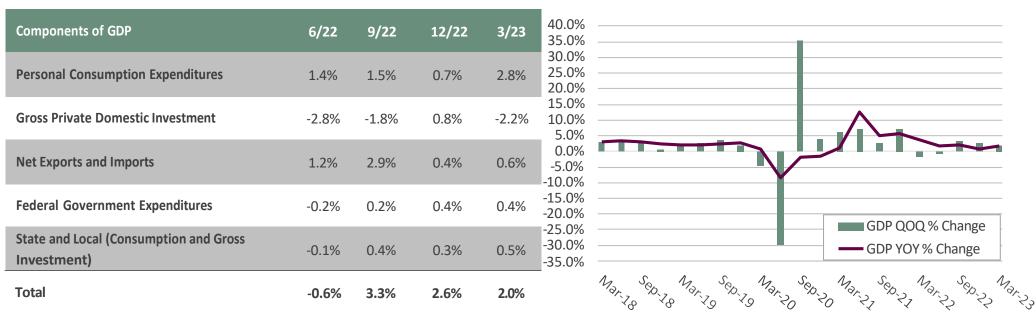

Source: Federal Reserve

The Institute for Supply Management (ISM) manufacturing index fell to 46.0 in June from 46.9 in May. This is the eighth consecutive month of readings below 50.0, which is indicative of contraction in the manufacturing sector. Industrial production rose 0.5% in April due to increases in manufacturing and mining. This equates to a 0.24% increase in industrial production from the prior year. Capacity utilization increased to 79.7% in April from a downwardly revised 79.4% in March, inching above its 1972-2021 average of 79.6%.

Gross Domestic Product (GDP)

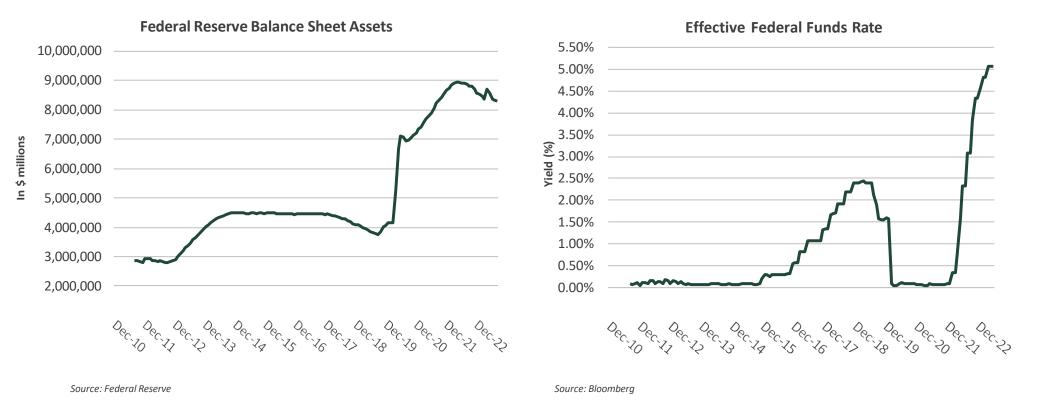

Gross Domestic Product (GDP)

Source: US Department of Commerce Source: US Department of Commerce

According to the third estimate, first quarter 2023 GDP growth was revised up to 2.0% from 1.3%. Stronger personal consumption expenditures were the primary driver of the upward revision. The consensus estimate calls for 1.2% growth for the second quarter and 1.3% growth for the full year 2023.

Federal Reserve

At the June meeting, the Federal Open Market Committee paused in their rate hiking campaign after ten straight rate increases and left the target Federal Funds rate in the current range of 5.00 - 5.25%. Market participants viewed the FOMC's decision as a 'hawkish' pause, expecting further tightening in the future, primarily based on the updated release of the FOMC's Summary of Economic Projections (SEP) forecast. The SEP is forecasting higher GDP, a lower unemployment rate, and higher PCE inflation compared to the March 2023 forecast. The median forecast for the Fed Funds rate was also increased to 5.6% in June, compared to the prior forecast of 5.1% in March, suggesting another 50 basis points of tightening in 2023. We believe the resiliency of future economic data will determine if the Federal Reserve can stay on hold for a period of time or will be forced to tighten policy further to bring inflation back down towards their 2% policy objective.

Bond Yields

At the end of June, the 2-year Treasury yield was 194 basis points higher, and the 10-Year Treasury yield was about 82 basis points higher, year-over-year. The inversion between the 2-year Treasury yield and 10-year Treasury yield widened to -106 basis points at June month-end versus - 76 basis points at May month-end. The average historical spread (since 2003) is about +130 basis points. The inversion between 3-month and 10-year Treasuries narrowed to -146 basis points in June from -176 basis points in May. The shape of the yield curve indicates that the probability of recession is increasing.

Section 2 | Account Profile

Investment Objectives

Safety of principal is the foremost objective of the investment program. The investment portfolio shall remain sufficiently liquid to meet all operating requirements that may be reasonably anticipated. The investment portfolio shall be designed with the objective of attaining a market rate of return throughout budgetary and economic cycles, taking into account the investment risk constraints and liquidity needs.

Chandler Asset Management Performance Objective

The performance objective for the portfolio is to earn a total rate of return through a market cycle that is equal to or above the return on the benchmark index.

Strategy

In order to achieve this objective, the portfolio invests in high-quality fixed income securities that comply with the investment policy and all regulations governing the funds.

Compliance

City of Elk Grove Consolidated

This portfolio is a consolidation of assets managed by Chandler Asset Management and assets managed internally by Client. Chandler relies on Client to provide accurate information for reporting assets and producing this compliance statement.

Important Disclosures

2023 Chandler Asset Management, Inc, An Independent Registered Investment Adviser.

Information contained herein is confidential. Prices are provided by ICE Data Services Inc ("IDS"), an independent pricing source. In the event IDS does not provide a price or if the price provided is not reflective of fair market value, Chandler will obtain pricing from an alternative approved third party pricing source in accordance with our written valuation policy and procedures. Our valuation procedures are also disclosed in Item 5 of our Form ADV Part 2A.

Performance results are presented gross-of-advisory fees and represent the client's Total Return. The deduction of advisory fees lowers performance results. These results include the reinvestment of dividends and other earnings. Past performance may not be indicative of future results. Therefore, clients should not assume that future performance of any specific investment or investment strategy will be profitable or equal to past performance levels. All investment strategies have the potential for profit or loss. Economic factors, market conditions or changes in investment strategies, contributions or withdrawals may materially alter the performance and results of your portfolio.

Index returns assume reinvestment of all distributions. Historical performance results for investment indexes generally do not reflect the deduction of transaction and/or custodial charges or the deduction of an investment management fee, the incurrence of which would have the effect of decreasing historical performance results. It is not possible to invest directly in an index.

Fixed income investments are subject to interest, credit and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

Ratings information have been provided by Moody's, S&P and Fitch through data feeds we believe to be reliable as of the date of this statement, however we cannot guarantee its accuracy.

Security level ratings for U.S. Agency issued mortgage-backed securities ("MBS") reflect the issuer rating because the securities themselves are not rated. The issuing U.S. Agency guarantees the full and timely payment of both principal and interest and carries a AA+/Aaa/AAA by S&P, Moody's and Fitch respectively.

Your qualified custodian bank maintains control of all assets reflected in this statement and we urge you to compare this statement to the one you receive from your qualified custodian. Chandler does not have any authority to withdraw or deposit funds from/to the custodian account.

ICE BofA 1-5 Yr AAA-A US Corp & Govt Index

The ICE BofA US 1-5 Year AAA-A US Corporate & Government Index tracks the performance of US dollar denominated investment grade debt publicly issued in the US domestic market, including US Treasury, US agency, foreign government, supranational, and corporate securities. Qualifying securities must be issued from US issuers and be rated AAA through A3 (based on an average of Moody's, S&P and Fitch). In addition, qualifying securities must have at least one year remaining term to final maturity and less than five years remaining term to final maturity, at least 18 months to final maturity at point of issuance, a fixed coupon schedule, and a minimum amount outstanding of \$1 billion for US Treasuries and \$250 million for all other securities.
