**REASONS WHY THIS PROJECT IS EXEMPT OR DOES NOT REQUIRE FURTHER ENVIRONMENTAL DOCUMENTATION:**

The California Environmental Quality Act (CEQA) requires analysis of agency approvals of discretionary "Projects." A "Project," under CEQA, is defined as "the whole of an action, which has a potential for resulting in either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment" (CEQA Guidelines Section 15378). The proposed Project is a project under CEQA.

State CEQA Guidelines Section 15183, provides that projects which are consistent with the development density established by a Community Plan, General Plan, or Zoning for which an environmental impact report (EIR) has been certified "shall not require additional environmental review, except as might be necessary to examine whether there are project-specific significant effects which are peculiar to the project or its site." An EIR was prepared and certified by the City Council as part of the Elk Grove General Plan (SCH# 2017062058).

The proposed Project is consistent with the development density established by the General Plan EIR because the parcel split will result in new parcels over two acres in size at a density consistent with the rural area range of 0.1 to 0.5 units per acre. The Project does not include the conversion of qualified agricultural or projected farmland and, therefore, does not require mitigation. While there is no physical construction proposed with this Project, buildout consistent with the EGMC would likely result in the development of one, new single-family residential unit on each of the newly created lots. Any future construction on the Project site shall comply with EGMC development standards for land grading and erosion control (Chapter 16.44), tree protection (Chapter 19.12), Swainson's hawk surveys and possible mitigation (Chapter 16.130), in addition to other pre-construction surveys as defined by the General Plan EIR. Compliance with these standards has been included in the conditions of approval for the Project. Additionally, The Project consists of a residential Project resulting in less than 10 dwelling units. Residential projects less than 10 dwelling units are exempt from Vehicle Miles Traveled (VMT) analysis.

No potential new impacts related to the Project have been identified that would necessitate further environmental review beyond the impacts and issues already disclosed and analyzed in the General Plan EIR. No other special circumstances exist that would create a reasonable possibility that the Project will have a significant adverse effect on the environment. Therefore, pursuant to State CEQA Guidelines Section 15183, no further environmental review is required.
