

If a cleanup crew or dumpster service offers incredibly cheap rates, this might be why:

Help us put a stop to illegal dumping by hiring only **registered commercial haulers**. These companies are bound to vigorous monitoring and reporting requirements, mandatory participation in recycling programs, and other conditions to protect public health and safety. They're also obligated to help us meet our State-mandated waste diversion goals.

Only **registered commercial haulers** can legally charge a fee for collecting commercial solid waste, including C&D debris in the City of Elk Grove.

Hiring an illegal hauler without city authorization may put your building permit in jeopardy.

### What are the basics?

The City of Elk Grove has worked closely with the building community to ensure that the C&D Debris Recycling Program is simple and streamlined. It's as easy as 1-2-3:

- 1. Make a Waste Management Plan**  
Decide how you are going to manage debris on your job site and how you will satisfy your recycling requirements.
- 2. Execute Your Waste Management Plan**  
Recycle the targeted materials and hire only registered commercial haulers.
- 3. Report Your Results**  
You will receive a blank waste log with your building permit. Maintain it and return the completed form at the end of your project.

### Educate Your Employees

You must inform all your employees and subcontractors about your waste management plan, because you are responsible for all of the debris from your project.

## What is the Construction and Demolition (C&D) Debris Recycling Program?

As of July 1, 2010, contractors, subcontractors and employees or their construction site, are responsible for the proper recycling of construction and demolition debris.

The City of Elk Grove's Construction and Demolition (C&D) Debris Recycling Program requires that these five (5) materials be recycled:

1. **Scrap metal**
2. **Inert materials**  
(concrete, asphalt, bricks, etc.)
3. **Corrugated cardboard**
4. **Wooden pallets**
5. **Clean wood waste** (unpainted, untreated lumber and plywood—fasteners OK)

## What Does it Cost?

For projects more than \$250,000 in value, the fee is 0.04% of the project value (with a maximum fee of \$800 for a \$2 million project or more) and projects between \$0 - \$250,000 will need to submit a waste management plan to the City of Elk Grove Building Safety & Inspection Department.

Unlike many other programs around the State, a performance deposit is not required. However, if you are out of compliance, you may be required to place a deposit on your next project. Other probationary measures may also be applied to your subsequent projects if you hire illegal haulers or fail to recycle.

## How do I comply?

### Complete a Waste Management Plan

Identify the waste you will be generating on your project. The plan should include recycling and hauling methods.

### Outline a Recycling Method

- Source Separation: separate the individual materials into distinct containers or corrals; OR
- Mixed Recovery: combine materials into one dumpster for sorting at a Certified C&D Sorting Facility.

### Outline a Hauling Method

- Self-Haul, or
- Hire a registered commercial hauler

### Maintain and Return a Waste Log

You must keep a log of all waste hauling activity in the permit folder on your construction site. You will be given a blank Waste Log with your permit.

Return your completed Waste Log within 30 days of your Certificate of Occupancy or when your project is finalized. You do not need to factor recycling percentages by material.

Failure to return your completed Waste Log will result in additional steps when you apply for your next building permit.

## Who Can I Hire to Haul Waste?

Only registered commercial haulers can collect and haul commercial solid waste (including C&D debris) in the City of Elk Grove.

Registered Commercial Haulers	Phone Number
