APPLICANT:
Andy Chen and Judy Cuong
9993 Whirlaway Lane
Elk Grove, CA 95624

EXEMPTION STATUS:
☒ Ministerial [Section 21080(b); 15268];
☒ Declared Emergency [Section 21080(b)(3); 15269(a)];
REASONS WHY THIS PROJECT IS EXEMPT OR DOES NOT REQUIRE FURTHER ENVIRONMENTAL DOCUMENTATION:

CEQA requires analysis of agency approvals of discretionary "projects." A "project," under CEQA, is defined as "the whole of an action, which has a potential for resulting in either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment" (State CEQA Guidelines Section 15378). The proposed Project is a project under CEQA.

The Project is exempt from CEQA pursuant to CEQA Guideline Section 15303 (New Construction or Conversion of Small Structures) of Title 14 of the California Code of Regulations. CEQA Guidelines Section 15303 (e) applies to projects that consists of construction and location of limited numbers of new, small facilities, or structures; installation of small new equipment and facilities in small structures; and the conversion of existing small structures from one use to another where only minor modifications are made in the exterior of the structure. Accessory (appurtenant) structures including garages, carports, patios, swimming pools, and fences.

The Project consists of Type 1 Design Review and Major Certificate of Appropriateness to legalize an open material metal fence for an existing commercial business measuring 4 feet, 8 inches to the top rail and 5 feet, 6 inches to the top post. The existing structures were built in the 1910's as a residence and later transitioned into a commercial use in the late 1980's. The fence is situated at the front of the property and is not connected to any of the existing structures. An open material fence was constructed in front of the property in 2012 but has since been removed. The exterior improvement does not alter the craftsman-style bungalow or any other historically significant resources on the site as the fence is not connected and an open material.

The fence would not present an adverse change to the historic character of the structures as there are no circumstances that would create the possibility of an adverse effect on the environment the fence is an open material and the historic structures can still be viewed from the street. The structures will retain their historic character and no expansion of the existing structure is proposed with this application.
