PROJECT TITLE: ARCO AM/PM Car Wash Expansion (PLNG20-020)
PROJECT LOCATION - SPECIFIC: 9590 Harbour Point Drive
ASSessor’s PARCEL NUMBER(s): 119-1920-020-0000
PROJECT LOCATION - CITY: Elk Grove
PROJECT LOCATION - COUNTY: Sacramento
PROJECT DESCRIPTION: The Project consists of a Conditional Use Permit Amendment, Minor Design Review, and Tree Removal Permit to allow for the demolition of the existing ±1,294-square foot automatic car wash and construction of a new ±2,250 square foot automatic car wash with utility room. Additional services would include three vacuum areas covered by canopies (with a total of 10 stations), landscaping, lighting, and accessibility upgrades.

APPLICATION STATUS: Categorical Exemption [Section 15332]
REASONS WHY THIS PROJECT IS EXEMPT OR DOES NOT REQUIRE FURTHER ENVIRONMENTAL DOCUMENTATION:

CEQA requires analysis of agency approvals of discretionary “projects.” A “project,” under CEQA, is defined as “the whole of an action, which has a potential for resulting in either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment” (State CEQA Guidelines Section 15378). The proposed Project is a project under CEQA.

Staff has reviewed the Project and determined that it is categorically exempt from CEQA review pursuant to State CEQA Guidelines Section 15332 (In-fill Development). State CEQA Guidelines Section 15332 consists of projects characterized as in-fill development that meet the following conditions:

a) The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.

b) The proposed development occurs within city limits on a project site of no more than five acres substantially surrounded by urban uses.

c) The project site has no value, as habitat for endangered, rare, or threatened species.

d) Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality.

e) The site can be adequately served by all required utilities and public services.

The Project consists of a Conditional Use Permit Amendment, Minor Design Review, and Tree Removal Permit to allow the existing ARCO AM/PM to demolish an existing ±1,294-square foot automatic car wash and construct a new ±2,250 square foot automatic car wash with utility room. Additional services would include three vacuum areas covered by canopies (with a total of 10 vacuum stations), landscaping, lighting, and accessibility upgrades. Additionally, a Tree Removal Permit would allow the Applicant to remove two trees of local importance to accommodate the accessibility upgrades and on-site improvements.

The Project site is within an urban area on a parcel that is less than five acres in size. The Project site does not contain sensitive species, and the proposed expansion would not impact traffic or circulation. A noise study concluded that the proposed Project, as conditioned, would comply with the all General Plan land use and Noise Control standards for public health and safety. The site would maintain access to the existing utilities and public services and would not impact the surrounding bicycle or pedestrian paths.
