Subject: CNUMC_Hospital Laboratories and Sample HazMat Inventory

The CNUMC Hospital Building does not have any teaching or research wet laboratories as part of the facility. All the spaces with any sort of lab component are as follows:

- Pharmacy with a USP 800 compliant area for compounding hazardous drugs for IV bags such as for chemotherapy and the ICU.
- Satellite Pharmacy at ICU for compounding IV bags for treatment.
- Two STAT labs with point of care equipment for urinalysis and bloodwork.
- Clinical Lab limited to Blood Bank and Urinalysis. Other Clinical Lab work will be outsourced to an off-site vendor.
- Morgue / Autopsy Area for Pathology.

Attached is a sample Hazardous Material Inventory for a similar sized hospital. It is anticipated that materials would be similar in nature and quantity with the exception that we will meet more stringent requirements for LEED Indoor Air Quality. We are endeavoring to provide more information about handling of materials in an hospital environment.
