**NOTES:**

1. On thoroughfares, arterials, and where 6 foot sidewalks are required by the improvement standards. 5 foot minimum all other locations.

2. Cross slope of separated sidewalk to be 1.5% (1.0% to 2.0% allowable). Longitudinal grades not to exceed 5%.

3. Use of separated sidewalks will require street lighting review in relation to landscape plan, and may require additional sidewalk lighting.

4. Compaction under separated sidewalk area at 90%, under attached area at 95%.
