As a critical piece of the Capital Southeast Connector, the City of Elk Grove is widening Grant Line Road from two lanes to four lanes between Waterman Road and Bradshaw Road, a 1.5 mile segment known as B2. Along with the widening, corridor improvements will include new traffic signals, sound walls, utility relocations and a multi-purpose path.

CURRENT ACTIVITIES
• Continue utility relocation
• Continue installation of 16" water line
• Roadway excavation
• Underground electrical/signal work
• Storm drain installation

WORK COMPLETED
• Clearing and grubbing
• Fence installation
• Completing setting of K-rail and temporary striping for Stage 1 construction

When traveling through the construction zone, please observe all construction signs and the instructions of on-site personnel.
