

Important Notice Regarding The 2010 California Building Code (CBC)

If you are an Architect, Engineer, Designer or Contractor that performs work within the State of California, please be advised that a new building code will take effect on **January 1, 2011**. The new **2010 California Building Code (CBC)** is based on the 2009 International Building Code (IBC) as amended by the California Building Code Commission.

In addition, there will be a new **2010 California Residential Code (CRC)** and a new **2010 California Green Building Standards** that are both new to California and are significantly different than the current CBC.

Additional new codes are the **2010 California Mechanical Code (CMC)**, **2010 California Electrical Code (CEC)**, **2010 California Plumbing Code (CPC)** and **2010 California Energy Code**.

All plan review applications submitted after December 31, 2010 will be required to comply with the new codes. All new codes are available for purchase directly from the International Code Council at www.iccsafe.org.

Training classes are available through the following organizations:

California Building Officials (CALBO)

www.CALBO.org

- General training related to all I-Codes
- California amendment training

Sacramento Valley Association of Building Officials (SVABO)

www.svabo.org
