

City's Annual Resurfacing Program Paves the Way

The City's Annual Resurfacing Program begins this month and continues through October, with several streets getting a much needed touch-up. Regular resurfacing of City streets extends the life of pavement while enhancing roadway safety and improving travel – it's a cost-effective way to use limited resources for maximum benefit.

Improvements in the program generally include the removal and replacement of deteriorated curbs and

gutters, reconstruction of curb ramps, reconstruction of failed pavement areas, milling of roadway surfaces, placement of the resurfacing treatment, and improvements to traffic signals.

Residents and businesses adjacent to streets that will be affected will receive notifications providing detail information of the project. Door hangers will also be sent out 3-days prior to the actual resurfacing operations.

The following streets are included in this year's program:

- **Bruceville Road (Laguna Blvd to Elk Grove Blvd)**
- **Elk Grove Blvd (School to Waterman)**
- **Calvine Road (South lanes) at Elk Grove-Florin Intersection**
- **33 residential and collector streets through out the City – totaling 6 miles**

For more information, contact Ann Herner at 478-2241.

Stay Healthy This Summer

Summer Safe Checklist:

As the summer sun welcomes us for more outdoor activities, exercising some caution will help ensure a safe, healthy summer for the whole family.

Prevent dehydration by drinking plenty of water. Keep in mind that infants and toddlers are more susceptible to dehydration.

Stay cool by wearing light colored, loose fitting clothing.

Protect your eyes from the sun's UV rays with sunglasses.

Wear sunscreen with at least SPF 15 to prevent sunburn.

Avoid mosquito bites by covering up as much as possible and draining standing water. [www.fightthebite.net]

Never swim alone. Always supervise children when in or around water and remember that swimming and alcohol don't mix.

At barbecues: Be sure meat is cooked thoroughly. Wash hands, utensils, and cutting boards thoroughly after coming in contact with raw meat. Never eat food that has been sitting out.

Restrict outdoor activities when air quality is low and don't forget your medication and/or inhalers if you have asthma.

Don't forget your pets. They can be affected by the heat just as people can.
