CITY SEEKS PUBLIC INPUT ON THE FLOOD CONTROL AND STORM DRAINAGE MASTER PLAN

Elk Grove, CA – The next Storm Drainage Master Plan (SDMP) public workshop will be held on Thursday, September 10.

The City has formed an Expert Advisory Committee to address the various community interests and concerns and therefore allow the creation of a stronger and more comprehensive Storm Drainage Master Plan. The City will present the initial Expert Advisory Committee meeting discussions and outcomes at the workshop and allow residents to comment on the process so far.

In addition, the City would like to hear from the public about drainage, flooding or water quality issues that residents have experienced in the past. This information will be used for comparison of the hydrologic and hydraulic computer models prepared for the SDMP and help identify new drainage concerns not currently classified by the Public Works Department. The information solicited will also help determine probable cause of flooding factors and help determine preferred stormwater solutions. Pictures of flooding or drainage incidents are welcome! Please bring them with you to the workshop or send the pictures to Fernando Duenas at the email address below. Along with the pictures, please include a brief description of the incident, year and month it occurred and location information.

To help streamline the information gathering process, the City has created a stormwater questionnaire. Please take a moment to fill out the questionnaire at the link below:

<http://www.egpublicworks.org/workshop.asp>

The workshop will be held from 6 p.m. to 8 p.m. in the City of Elk Grove's Council Chambers located at 8400 Laguna Palms Way. An agenda will also be posted before the upcoming workshop on the link above.

All parties are encouraged and welcomed to attend the workshops. For more information, contact Fernando Dueñas at (916) 627-3434 or email him at fduenas@elkgrovecity.org
