FOR IMMEDIATE RELEASE

December 11, 2009

### **Gas Line Maintenance and Repair Taking Place in Elk Grove Today**

Elk Grove, CA – The City of Elk Grove was notified by the Pacific Gas & Electric Company (PG&E) this morning that there will be construction and maintenance repairs taking place this morning and afternoon to the major gas transmission line that runs through the City.

This is standard maintenance that is done on a regular basis to make improvements and ensure efficiency in service. Earlier this morning, PG&E released a controlled leakage of gas for maintenance purposes and will release another controlled leakage of gas this afternoon. Just in case you smell any gas throughout the City, these controlled leakages are NOT harmful and will not cause any disruptions to service.

For more information, please contact PG&E at 1-800-743-5000.
