

## Recycling & Waste Management Plan

The California Solid Waste Reuse and Recycling Access Act requires new commercial and multi-family developments of 5 units or more, or improvements that add 30% or more to the existing floor area, to include adequate, accessible, and convenient areas for collecting and loading recyclable materials.

Please refer to the *Space Allocation and Enclosure Design Standards and Guidelines for Trash and Recycling* before completing a Recycling & Waste Management Plan. You may download a copy of the document at [www.elkgrovecity.org/recycle](http://www.elkgrovecity.org/recycle) and click on the link for the Design Standards for Trash/Recycling. For questions pertaining to the *Design Standards and Guidelines* or for assistance completing this form, contact Recycling & Waste at (916) 627-3452.

**Please answer the questions and provide the information requested below. Use additional sheets if necessary.**

1. Provide a summary of the solid waste and recycling services to be provided at this location (i.e. commercial solid waste, medical waste, organic waste, hazardous waste, cardboard compactor, used oil, etc.).
  
2. Provide an estimate of the trash and recycling capacity required in your project. (The recycling capacity should equal 50% of the total capacity.)
  
3. Provide a diagram (on a separate page) showing the dimensions of all enclosures, and include the enclosure locations and placements. (The diagram should include enough space for collection vehicles to access the enclosures.)
