**NOTICE OF PREPARATION OF A DRAFT ENVIRONMENTAL IMPACT REPORT**

---

**DATE:** June 19, 2020

**TO:** Responsible and Trustee Agencies, Organizations, and Interested Parties

**LEAD AGENCY:** City of Elk Grove  
Contact: Christopher Jordan, Director of Strategic Planning and Innovation  
8401 Laguna Palms Way  
Elk Grove, CA 95758

**SUBJECT:** Environmental Impact Report for the City of Elk Grove 2021 Housing Element Update

---

In discharging its duties under Section 15021 of the California Environmental Quality Act (CEQA) Guidelines, the City of Elk Grove (as lead agency, hereinafter “City” or “Elk Grove”) intends to prepare an environmental impact report (EIR), consistent with Section 15161 of the State CEQA Guidelines (Title 14 of the California Code of Regulations, hereinafter the “CEQA Guidelines”), for the **2021 Housing Element Update** (the “Project,” described later in this document). In accordance with Section 15082 of the CEQA Guidelines, the City has prepared this notice of preparation (NOP) to provide the Office of Planning and Research, responsible and trustee agencies, and other interested parties with sufficient information describing the Project and its potential environmental effects.

The City made the determination to prepare an EIR following preliminary review of the Project. Pursuant to CEQA Guidelines Section 15063(a), because an EIR is needed, an initial study has not been prepared. Probable environmental effects of the Project are described in the attached Project summary.

As specified by the CEQA Guidelines, the NOP will be circulated for a 30-day review period. **The comment period runs from Monday, June 22, 2020, to Tuesday, July 22, 2020.** The City welcomes public input during the review period. If the City has not received either a response or a well-justified request for additional time by a responsible agency by the end of the review period, the City may presume that the responsible agency has no response (CEQA Guidelines Section 15082[b][2]).

CEQA provides for a Lead Agency to facilitate one or more Scoping Meetings, which provide opportunity for determining the scope and content of the EIR. Traditionally, the City hosts one Scoping Meeting for the general public during the NOP comment period. In accordance with State and local health orders limiting in-person public meetings, the City is providing an alternative method for the Scoping Meeting. A video presentation by staff, introducing the Project and outlining the CEQA process, is available for review at <http://www.elkgrovecity.org/housingelement>. The website also provides a method for directly providing comments. This video and comment opportunity will be available at the above link throughout the NOP comment period (June 22 to July 22).

Comments may also be submitted in writing during the review period and addressed to:

# PROJECT LOCATION AND SETTING

The City is located in Sacramento County and consists of approximately 42 square miles within its boundary (see Figure 1). Land uses are regulated under the City General Plan, which was comprehensively updated in 2019. The City General Plan established a Planning Area (approximately 31,238 acres) that includes lands outside the current City limits. Existing land uses in the City consist of residential at varying densities, commercial, office, industrial, park, and open space. The Planning Area primarily consists of agricultural lands and rural residential uses. Nearby natural open space and habitat areas include the Stone Lakes National Wildlife Refuge and the Sacramento River to the west, the Cosumnes River Preserve to the south, and the Regional County Sanitation District bufferlands to the northwest. Major roadway access to the City is provided by Interstate 5 and State Route 99.

# PROJECT DESCRIPTION

As identified above, the General Plan was comprehensively updated in 2019. The 2019 update incorporated the 2013–2021 Housing Element into General Plan Chapter 4, “Urban and Rural Development,” and its provisions of sufficient land, with appropriate use designations, for the construction of the housing units that the City must accommodate according to the Regional Housing Needs Allocation (RHNA) by 2021 (7,401 housing units). The purpose of the 2021 Housing Element Update is to establish parameters for future residential development and provide opportunities for purposeful expansion that are aligned with community desires, as well as regional growth objectives and State law. The proposed 2021 Housing Element Update will be compliant with Government Code Section 65583, which identifies the requirements for General Plan Housing Element sections. In summary, Government Code Section 65583 requires that the Housing Element identify and analyze existing and projected housing needs, as well as establish goals, policies, and actions to address these housing needs, including adequate provisioning of affordable and special-needs (e.g., agricultural workers, homeless people, seniors, single-parent households, large families, and persons with disabilities) housing.

The 2021 Housing Element Update will address any changes that have occurred since adoption of the current Housing Element. These changes include, among others, updated demographic information, housing needs data, and analysis of the availability of housing sites. The Housing Element map of available housing sites would be updated to identify sites that could accommodate the City’s RHNA for the 2021–2029 planning period. The City would also amend the General Plan land use designations and rezone sites in the City to accommodate the changes specified in the Project.

The RHNA quantifies the need for housing in each region statewide and is determined by the California Department of Housing and Community Development. The Sacramento Area Council of Governments (SACOG) is responsible for allocating the RHNA to each city and county in its region, which includes Elk Grove. The SACOG Regional Housing Needs Plan for the 2021–2029 planning period was adopted in March 2020 and will provide the RHNA methodology that applies to the Project. Elk Grove’s total RHNA for the 2021–2029 planning period is 8,263 units, allocated to specific income groups as shown in Table 1.

**Table 1. City of Elk Grove Regional Housing Needs Allocation**

	Income Level				Total RHNA
	Very Low	Low	Moderate	Above Moderate	
2021-2029 RHNA	2,661	1,604	1,186	2,812	8,263

Source: Sacramento Area Council of Governments Regional Housing Needs Plan 2021–2029, page ES-3

The City currently has an adequate number of zoned residential sites to meet RHNA requirements for the above moderate income group. It has identified 43 possible housing sites (18 existing sites and 25 new candidate sites) located within City limits that could accommodate housing to meet the RHNA very low, low, and moderate income groups (see Figure 2). Each site’s map ID, location, acreage, existing zoning, proposed zoning, and dwelling unit capacity potential are shown in Table 2. The 25 candidate sites, sites C-1 through C-25, would require rezoning.

**Table 2. Existing Sites and Candidate Sites for Very Low, Low, and Moderate Income Groups**

Map ID	General Location	Acreage	Existing Zoning	Proposed Zoning	Dwelling Unit Capacity Potential

C-25	Eden Gardens	5.17	AR-5	RD-25	109
<b>Total</b>	<b>261.5 acres with the capacity for 5,761 units</b>				

### Safety Element

The Project also includes an update to the General Plan Safety Element for consistency with AB 747 (Levine) and SB 99 (Nielsen). The revisions would incorporate emergency access route information and additional policies on community resiliency.

## REQUIRED APPROVALS

Actions to be taken by the City to adopt the Project include, but are not limited to:

- ▶ certification of the EIR prepared for the Project,
- ▶ adoption of General Plan amendments to update the Housing Element and to redesignate the land uses for certain selected housing sites,
- ▶ rezoning of selected housing sites; and
- ▶ adoption of General Plan Amendment to the Safety Element.

After adoption, the updated Housing Element will be submitted to the California Department of Housing and Community Development for certification.

## PROBABLE ENVIRONMENTAL EFFECTS

The EIR will evaluate whether implementing the proposed Project would potentially result in one or more significant environmental effects. The following issue areas will be addressed in the EIR:

- ▶ Aesthetics
- ▶ Air Quality
- ▶ Biological Resources
- ▶ Archaeological, Historical, and Tribal Cultural Resources
- ▶ Geology and Soils
- ▶ Energy
- ▶ Greenhouse Gases and Climate Change
- ▶ Hazards and Hazardous Materials
- ▶ Hydrology and Water Quality
- ▶ Land Use and Planning
- ▶ Noise and Vibration
- ▶ Population and Housing
- ▶ Public Services
- ▶ Recreation
- ▶ Transportation and Traffic
- ▶ Utilities and Service Systems

### Issues Scoped Out from Analysis in the EIR

The City anticipates that the Project would have less-than-significant or no impacts on the following environmental issue areas. These areas will not be discussed in the EIR for the reasons discussed below.

#### Agriculture and Forestry Resources

No forestry resources or timberlands are in the City or its Planning Area. The EIR certified for the City's 2019 General Plan Update evaluated the potential for impacts on agricultural resources in the City's Planning Area. Because this issue was evaluated in that document and no additional agricultural impacts would occur as a result of implementing the Housing Element Update, this issue will not be discussed in the EIR.

#### Mineral Resources

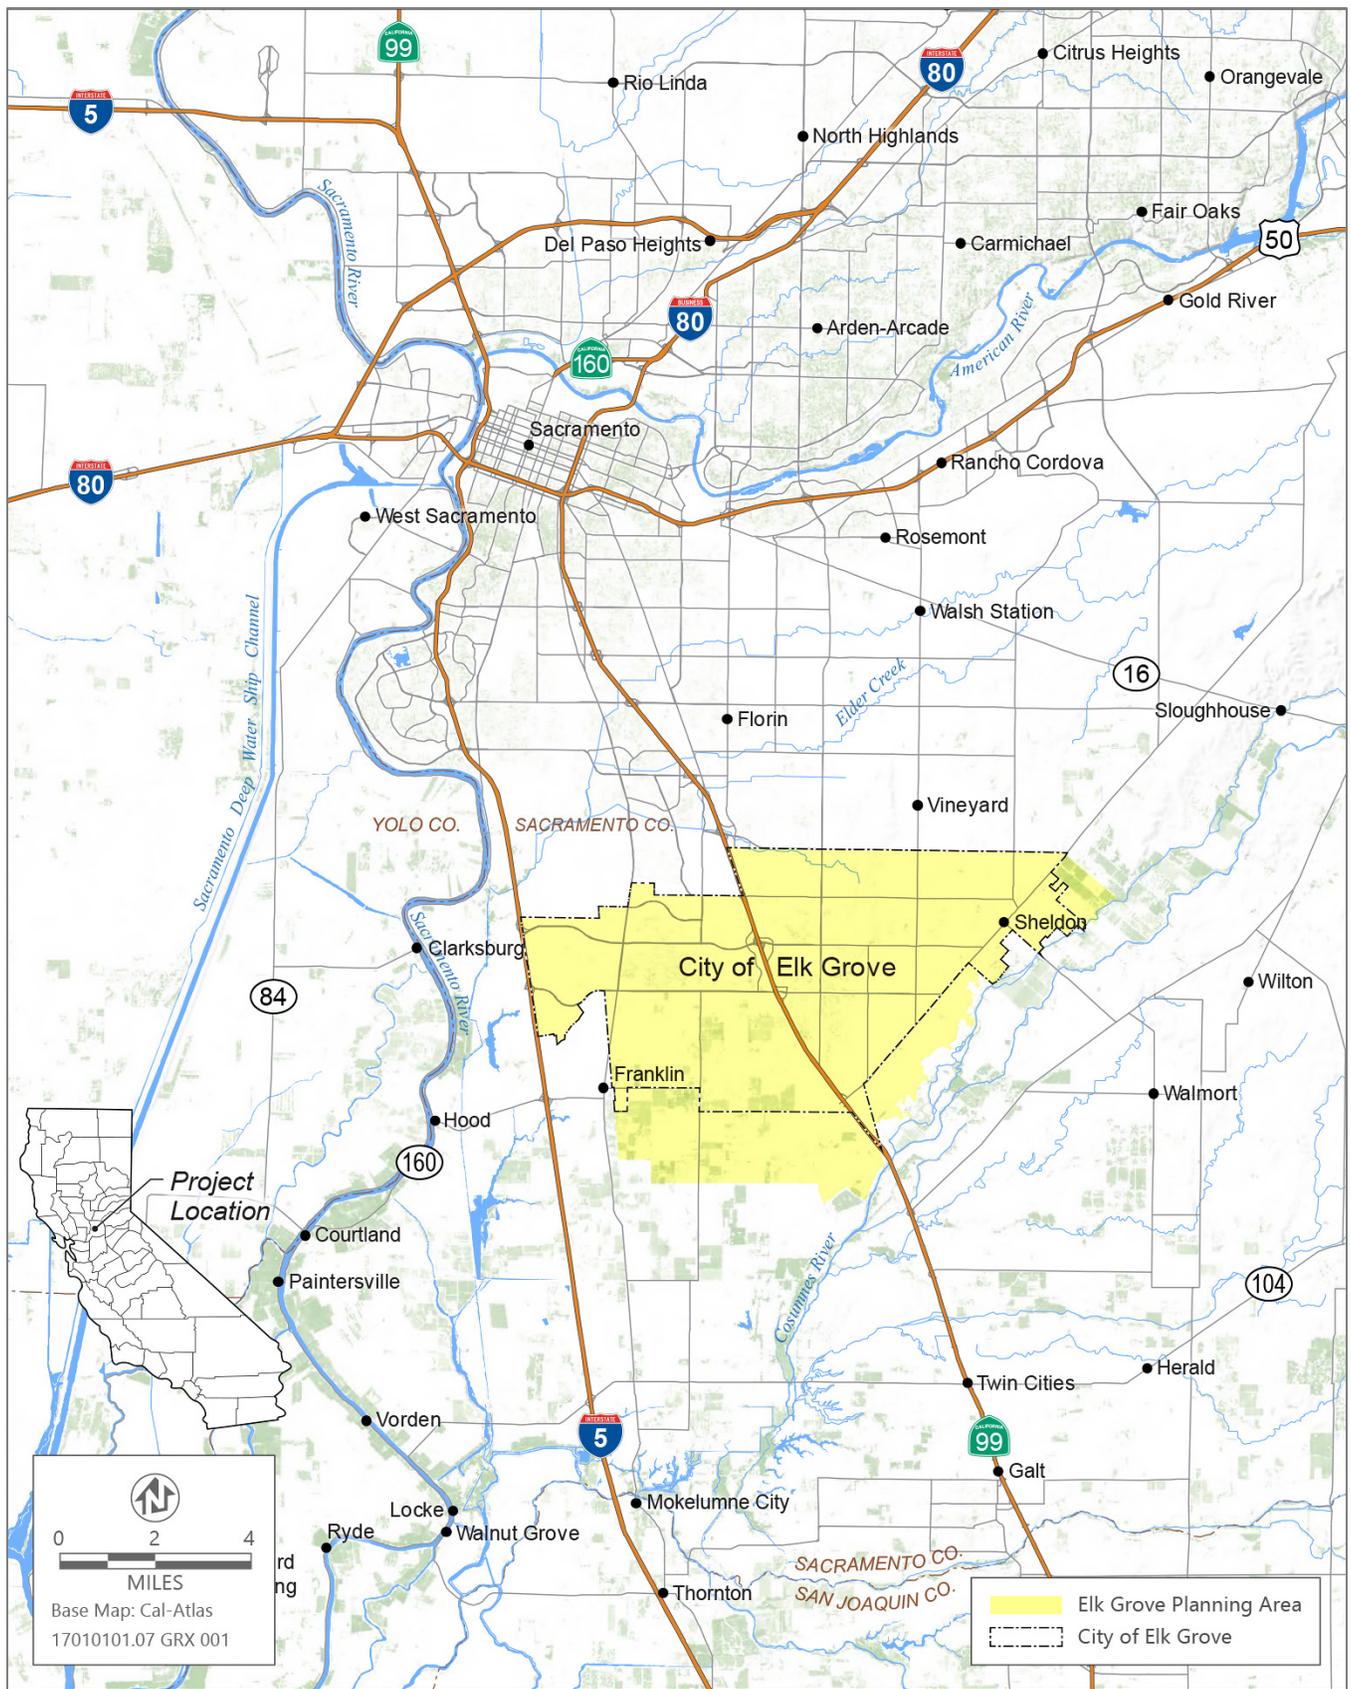

No significant mineral resources have been identified in the City. None of the candidate housing sites are used for mineral extraction, nor are any of the sites designated as an important mineral recovery site. Therefore, there would be no impact on mineral resources, and this impact will not be discussed in the EIR.

#### Seiche, Tsunami, and Mudflow

The City's location (inland, away from any water bodies) and topography (relatively flat) ensure that there would be no impact related to seiche, tsunami, or mudflow. Therefore, this impact will not be discussed in the EIR.

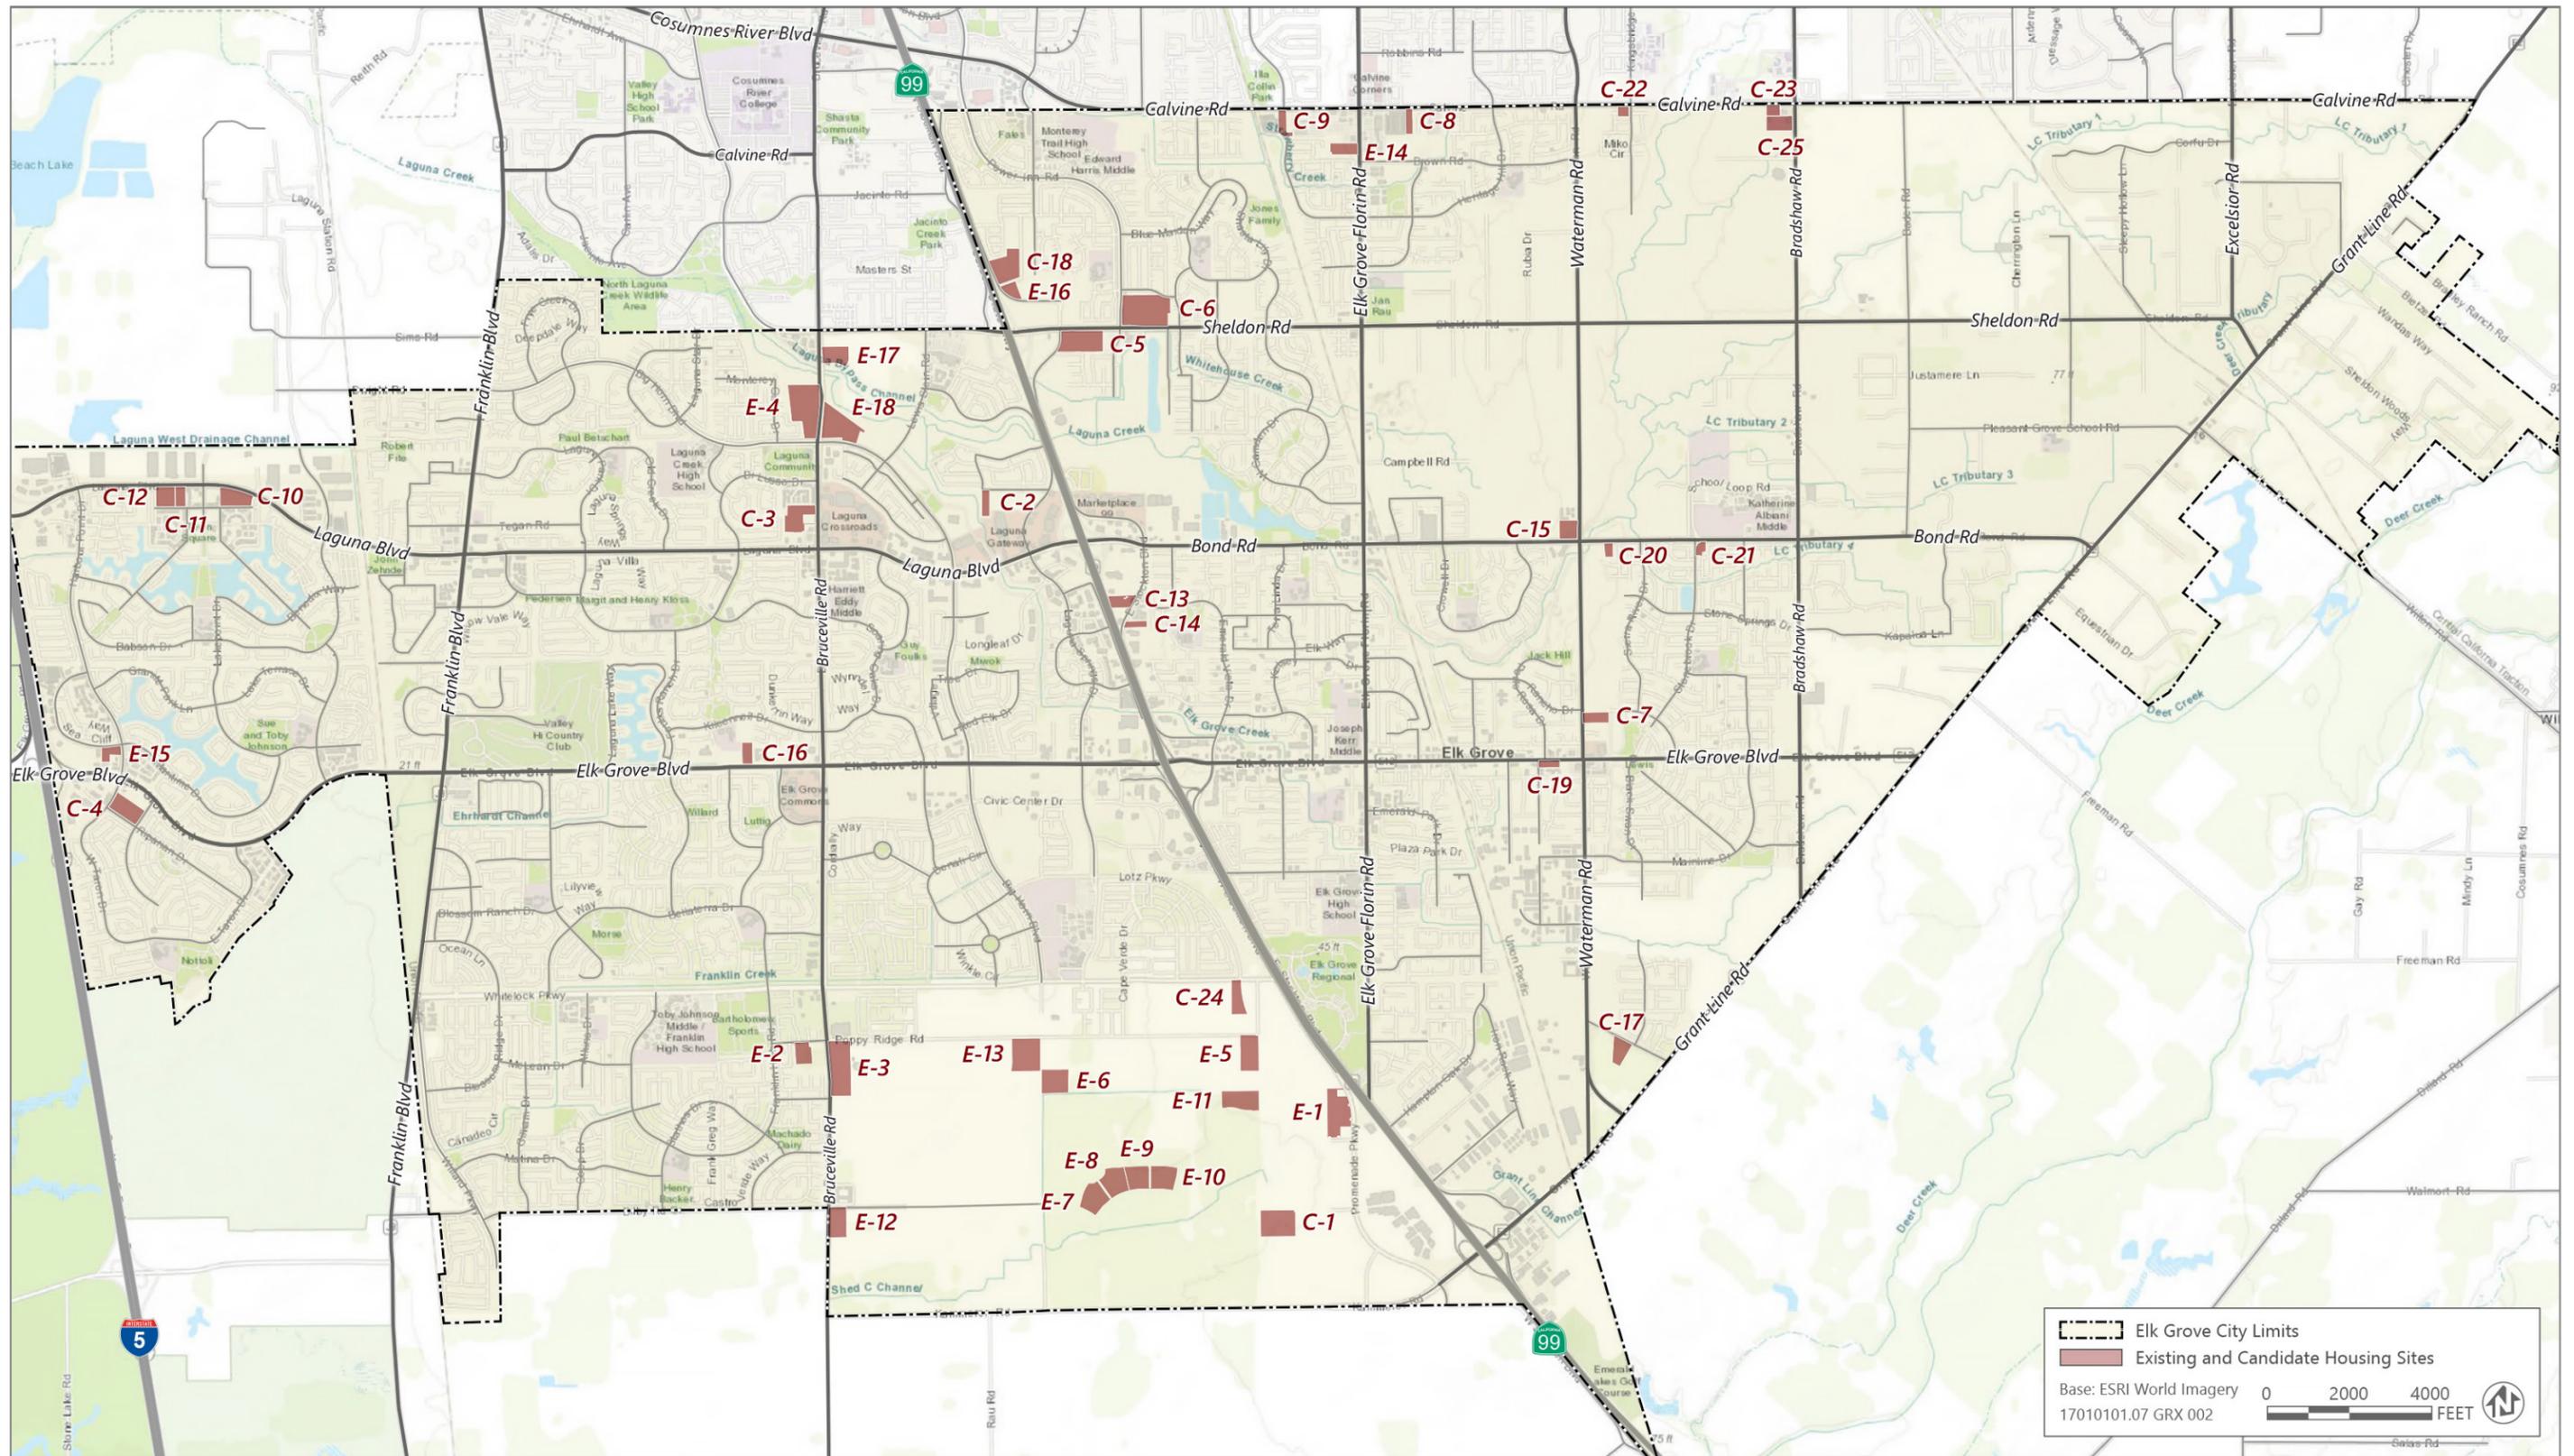

#### Wildfire

The City is not located in or near a Very High Fire Hazard Severity Zone. Therefore, there would not be a significant impact related to wildfire, and this issue will not be discussed in the EIR.

**Re: 2020069032, 2021 Housing Element Update Project, Sacramento County**

Dear Mr. Jordan:

The Native American Heritage Commission (NAHC) has received the Notice of Preparation (NOP), Draft Environmental Impact Report (DEIR) or Early Consultation for the project referenced above. The California Environmental Quality Act (CEQA) (Pub. Resources Code §21000 et seq.), specifically Public Resources Code §21084.1, states that a project that may cause a substantial adverse change in the significance of a historical resource, is a project that may have a significant effect on the environment. (Pub. Resources Code § 21084.1; Cal. Code Regs., tit.14, § 15064.5 (b) (CEQA Guidelines § 15064.5 (b)). If there is substantial evidence, in light of the whole record before a lead agency, that a project may have a significant effect on the environment, an Environmental Impact Report (EIR) shall be prepared. (Pub. Resources Code §21080 (d); Cal. Code Regs., tit. 14, § 5064 subd.(a)(1) (CEQA Guidelines § 15064 (a)(1))). In order to determine whether a project will cause a substantial adverse change in the significance of a historical resource, a lead agency will need to determine whether there are historical resources within the area of potential effect (APE).

CEQA was amended significantly in 2014. Assembly Bill 52 (Gatto, Chapter 532, Statutes of 2014) (AB 52) amended CEQA to create a separate category of cultural resources, "tribal cultural resources" (Pub. Resources Code §21074) and provides that a project with an effect that may cause a substantial adverse change in the significance of a tribal cultural resource is a project that may have a significant effect on the environment. (Pub. Resources Code §21084.2). Public agencies shall, when feasible, avoid damaging effects to any tribal cultural resource. (Pub. Resources Code §21084.3 (a)). **AB 52 applies to any project for which a notice of preparation, a notice of negative declaration, or a mitigated negative declaration is filed on or after July 1, 2015.** If your project involves the adoption of or amendment to a general plan or a specific plan, or the designation or proposed designation of open space, on or after March 1, 2005, it may also be subject to Senate Bill 18 (Burton, Chapter 905, Statutes of 2004) (SB 18). **Both SB 18 and AB 52 have tribal consultation requirements.** If your project is also subject to the federal National Environmental Policy Act (42 U.S.C. § 4321 et seq.) (NEPA), the tribal consultation requirements of Section 106 of the National Historic Preservation Act of 1966 (154 U.S.C. 300101, 36 C.F.R. §800 et seq.) may also apply.

The NAHC recommends consultation with California Native American tribes that are traditionally and culturally affiliated with the geographic area of your proposed project as early as possible in order to avoid inadvertent discoveries of Native American human remains and best protect tribal cultural resources. Below is a brief summary of portions of AB 52 and SB 18 as well as the NAHC's recommendations for conducting cultural resources assessments.

**Consult your legal counsel about compliance with AB 52 and SB 18 as well as compliance with any other applicable laws.**

## AB 52

AB 52 has added to CEQA the additional requirements listed below, along with many other requirements:

**1. Fourteen Day Period to Provide Notice of Completion of an Application/Decision to Undertake a Project:**

Within fourteen (14) days of determining that an application for a project is complete or of a decision by a public agency to undertake a project, a lead agency shall provide formal notification to a designated contact of, or tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, to be accomplished by at least one written notice that includes:

- a. A brief description of the project.
- b. The lead agency contact information.
- c. Notification that the California Native American tribe has 30 days to request consultation. (Pub. Resources Code §21080.3.1 (d)).
- d. A "California Native American tribe" is defined as a Native American tribe located in California that is on the contact list maintained by the NAHC for the purposes of Chapter 905 of Statutes of 2004 (SB 18). (Pub. Resources Code §21073).

**2. Begin Consultation Within 30 Days of Receiving a Tribe's Request for Consultation and Before Releasing a Negative Declaration, Mitigated Negative Declaration, or Environmental Impact Report:**

A lead agency shall begin the consultation process within 30 days of receiving a request for consultation from a California Native American tribe that is traditionally and culturally affiliated with the geographic area of the proposed project. (Pub. Resources Code §21080.3.1, subds. (d) and (e)) and prior to the release of a negative declaration, mitigated negative declaration or Environmental Impact Report. (Pub. Resources Code §21080.3.1(b)).

- a. For purposes of AB 52, "consultation shall have the same meaning as provided in Gov. Code §65352.4 (SB 18). (Pub. Resources Code §21080.3.1 (b)).

**3. Mandatory Topics of Consultation If Requested by a Tribe:** The following topics of consultation, if a tribe requests to discuss them, are mandatory topics of consultation:

- a. Alternatives to the project.
- b. Recommended mitigation measures.
- c. Significant effects. (Pub. Resources Code §21080.3.2 (a)).

**4. Discretionary Topics of Consultation:** The following topics are discretionary topics of consultation:

- a. Type of environmental review necessary.
- b. Significance of the tribal cultural resources.
- c. Significance of the project's impacts on tribal cultural resources.
- d. If necessary, project alternatives or appropriate measures for preservation or mitigation that the tribe may recommend to the lead agency. (Pub. Resources Code §21080.3.2 (a)).

**5. Confidentiality of Information Submitted by a Tribe During the Environmental Review Process:** With some exceptions, any information, including but not limited to, the location, description, and use of tribal cultural resources submitted by a California Native American tribe during the environmental review process shall not be included in the environmental document or otherwise disclosed by the lead agency or any other public agency to the public, consistent with Government Code §6254 (r) and §6254.10. Any information submitted by a California Native American tribe during the consultation or environmental review process shall be published in a confidential appendix to the environmental document unless the tribe that provided the information consents, in writing, to the disclosure of some or all of the information to the public. (Pub. Resources Code §21082.3 (c)(1)).

**6. Discussion of Impacts to Tribal Cultural Resources in the Environmental Document:** If a project may have a significant impact on a tribal cultural resource, the lead agency's environmental document shall discuss both of the following:

- a. Whether the proposed project has a significant impact on an identified tribal cultural resource.
- b. Whether feasible alternatives or mitigation measures, including those measures that may be agreed to pursuant to Public Resources Code §21082.3, subdivision (a), avoid or substantially lessen the impact on the identified tribal cultural resource. (Pub. Resources Code §21082.3 (b)).

- 7. Conclusion of Consultation:** Consultation with a tribe shall be considered concluded when either of the following occurs:
- a. The parties agree to measures to mitigate or avoid a significant effect, if a significant effect exists, on a tribal cultural resource; or
  - b. A party, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached. (Pub. Resources Code §21080.3.2 (b)).
- 8. Recommending Mitigation Measures Agreed Upon in Consultation in the Environmental Document:** Any mitigation measures agreed upon in the consultation conducted pursuant to Public Resources Code §21080.3.2 shall be recommended for inclusion in the environmental document and in an adopted mitigation monitoring and reporting program, if determined to avoid or lessen the impact pursuant to Public Resources Code §21082.3, subdivision (b), paragraph 2, and shall be fully enforceable. (Pub. Resources Code §21082.3 (a)).
- 9. Required Consideration of Feasible Mitigation:** If mitigation measures recommended by the staff of the lead agency as a result of the consultation process are not included in the environmental document or if there are no agreed upon mitigation measures at the conclusion of consultation, or if consultation does not occur, and if substantial evidence demonstrates that a project will cause a significant effect to a tribal cultural resource, the lead agency shall consider feasible mitigation pursuant to Public Resources Code §21084.3 (b). (Pub. Resources Code §21082.3 (e)).
- 10. Examples of Mitigation Measures That, If Feasible, May Be Considered to Avoid or Minimize Significant Adverse Impacts to Tribal Cultural Resources:**
- a. Avoidance and preservation of the resources in place, including, but not limited to:
    - i. Planning and construction to avoid the resources and protect the cultural and natural context.
    - ii. Planning greenspace, parks, or other open space, to incorporate the resources with culturally appropriate protection and management criteria.
  - b. Treating the resource with culturally appropriate dignity, taking into account the tribal cultural values and meaning of the resource, including, but not limited to, the following:
    - i. Protecting the cultural character and integrity of the resource.
    - ii. Protecting the traditional use of the resource.
    - iii. Protecting the confidentiality of the resource.
  - c. Permanent conservation easements or other interests in real property, with culturally appropriate management criteria for the purposes of preserving or utilizing the resources or places.
  - d. Protecting the resource. (Pub. Resource Code §21084.3 (b)).
  - e. Please note that a federally recognized California Native American tribe or a non-federally recognized California Native American tribe that is on the contact list maintained by the NAHC to protect a California prehistoric, archaeological, cultural, spiritual, or ceremonial place may acquire and hold conservation easements if the conservation easement is voluntarily conveyed. (Civ. Code §815.3 (c)).
  - f. Please note that it is the policy of the state that Native American remains and associated grave artifacts shall be repatriated. (Pub. Resources Code §5097.991).
- 11. Prerequisites for Certifying an Environmental Impact Report or Adopting a Mitigated Negative Declaration or Negative Declaration with a Significant Impact on an Identified Tribal Cultural Resource:** An Environmental Impact Report may not be certified, nor may a mitigated negative declaration or a negative declaration be adopted unless one of the following occurs:
- a. The consultation process between the tribes and the lead agency has occurred as provided in Public Resources Code §21080.3.1 and §21080.3.2 and concluded pursuant to Public Resources Code §21080.3.2.
  - b. The tribe that requested consultation failed to provide comments to the lead agency or otherwise failed to engage in the consultation process.
  - c. The lead agency provided notice of the project to the tribe in compliance with Public Resources Code §21080.3.1 (d) and the tribe failed to request consultation within 30 days. (Pub. Resources Code §21082.3 (d)).

The NAHC's PowerPoint presentation titled, "Tribal Consultation Under AB 52: Requirements and Best Practices" may be found online at: [http://nahc.ca.gov/wp-content/uploads/2015/10/AB52TribalConsultation\\_CalEPAPDF.pdf](http://nahc.ca.gov/wp-content/uploads/2015/10/AB52TribalConsultation_CalEPAPDF.pdf)

## SB 18

SB 18 applies to local governments and requires local governments to contact, provide notice to, refer plans to, and consult with tribes prior to the adoption or amendment of a general plan or a specific plan, or the designation of open space. (Gov. Code §65352.3). Local governments should consult the Governor's Office of Planning and Research's "Tribal Consultation Guidelines," which can be found online at: [https://www.opr.ca.gov/docs/09\\_14\\_05\\_Updated\\_Guidelines\\_922.pdf](https://www.opr.ca.gov/docs/09_14_05_Updated_Guidelines_922.pdf).

Some of SB 18's provisions include:

1. **Tribal Consultation:** If a local government considers a proposal to adopt or amend a general plan or a specific plan, or to designate open space it is required to contact the appropriate tribes identified by the NAHC by requesting a "Tribal Consultation List." If a tribe, once contacted, requests consultation the local government must consult with the tribe on the plan proposal. **A tribe has 90 days from the date of receipt of notification to request consultation unless a shorter timeframe has been agreed to by the tribe.** (Gov. Code §65352.3 (a)(2)).
2. **No Statutory Time Limit on SB 18 Tribal Consultation.** There is no statutory time limit on SB 18 tribal consultation.
3. **Confidentiality:** Consistent with the guidelines developed and adopted by the Office of Planning and Research pursuant to Gov. Code §65040.2, the city or county shall protect the confidentiality of the information concerning the specific identity, location, character, and use of places, features and objects described in Public Resources Code §5097.9 and §5097.993 that are within the city's or county's jurisdiction. (Gov. Code §65352.3 (b)).
4. **Conclusion of SB 18 Tribal Consultation:** Consultation should be concluded at the point in which:
  - a. The parties to the consultation come to a mutual agreement concerning the appropriate measures for preservation or mitigation; or
  - b. Either the local government or the tribe, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached concerning the appropriate measures of preservation or mitigation. (Tribal Consultation Guidelines, Governor's Office of Planning and Research (2005) at p. 18).

Agencies should be aware that neither AB 52 nor SB 18 precludes agencies from initiating tribal consultation with tribes that are traditionally and culturally affiliated with their jurisdictions before the timeframes provided in AB 52 and SB 18. For that reason, we urge you to continue to request Native American Tribal Contact Lists and "Sacred Lands File" searches from the NAHC. The request forms can be found online at: <http://nahc.ca.gov/resources/forms/>.

### NAHC Recommendations for Cultural Resources Assessments

To adequately assess the existence and significance of tribal cultural resources and plan for avoidance, preservation in place, or barring both, mitigation of project-related impacts to tribal cultural resources, the NAHC recommends the following actions:

1. Contact the appropriate regional California Historical Research Information System (CHRIS) Center ([http://ohp.parks.ca.gov/?page\\_id=1068](http://ohp.parks.ca.gov/?page_id=1068)) for an archaeological records search. The records search will determine:
  - a. If part or all of the APE has been previously surveyed for cultural resources.
  - b. If any known cultural resources have already been recorded on or adjacent to the APE.
  - c. If the probability is low, moderate, or high that cultural resources are located in the APE.
  - d. If a survey is required to determine whether previously unrecorded cultural resources are present.
2. If an archaeological inventory survey is required, the final stage is the preparation of a professional report detailing the findings and recommendations of the records search and field survey.
  - a. The final report containing site forms, site significance, and mitigation measures should be submitted immediately to the planning department. All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum and not be made available for public disclosure.
  - b. The final written report should be submitted within 3 months after work has been completed to the appropriate regional CHRIS center.

3. Contact the NAHC for:
  - a. A Sacred Lands File search. Remember that tribes do not always record their sacred sites in the Sacred Lands File, nor are they required to do so. A Sacred Lands File search is not a substitute for consultation with tribes that are traditionally and culturally affiliated with the geographic area of the project's APE.
  - b. A Native American Tribal Consultation List of appropriate tribes for consultation concerning the project site and to assist in planning for avoidance, preservation in place, or, failing both, mitigation measures.
  
4. Remember that the lack of surface evidence of archaeological resources (including tribal cultural resources) does not preclude their subsurface existence.
  - a. Lead agencies should include in their mitigation and monitoring reporting program plan provisions for the identification and evaluation of inadvertently discovered archaeological resources per Cal. Code Regs., tit. 14, §15064.5(f) (CEQA Guidelines §15064.5(f)). In areas of identified archaeological sensitivity, a certified archaeologist and a culturally affiliated Native American with knowledge of cultural resources should monitor all ground-disturbing activities.
  - b. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the disposition of recovered cultural items that are not burial associated in consultation with culturally affiliated Native Americans.
  - c. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the treatment and disposition of inadvertently discovered Native American human remains. Health and Safety Code §7050.5, Public Resources Code §5097.98, and Cal. Code Regs., tit. 14, §15064.5, subdivisions (d) and (e) (CEQA Guidelines §15064.5, subs. (d) and (e)) address the processes to be followed in the event of an inadvertent discovery of any Native American human remains and associated grave goods in a location other than a dedicated cemetery.

If you have any questions or need additional information, please contact me at my email address: [Nancy.Gonzalez-Lopez@nahc.ca.gov](mailto:Nancy.Gonzalez-Lopez@nahc.ca.gov).

Sincerely,

Nancy Gonzalez-Lopez  
Cultural Resources Analyst

Subject: **2021 Housing Element Update / NOP / 2020069032**

Dear Mr. Jordan:

The Sacramento Municipal Utility District (SMUD) appreciates the opportunity to provide comments on the Notice of Preparation (NOP) for the 2021 Housing Element Update Project (Project, SCH 2020069032). SMUD is the primary energy provider for Sacramento County and the proposed Project area. SMUD's vision is to empower our customers with solutions and options that increase energy efficiency, protect the environment, reduce global warming, and lower the cost to serve our region. As a Responsible Agency, SMUD aims to ensure that the proposed Project limits the potential for significant environmental effects on SMUD facilities, employees, and customers.

It is our desire that the project descriptions for the individual development projects undertaken as part of the plan will acknowledge any impacts related to the following:

- Overhead and or underground transmission and distribution line easements. Please view the following links on [smud.org](http://smud.org) for more information regarding transmission encroachment:
  - <https://www.smud.org/en/Business-Solutions-and-Rebates/Design-and-Construction-Services>
  - <https://www.smud.org/en/Corporate/Do-Business-with-SMUD/Land-Use/Transmission-Right-of-Way>
- Utility line routing
- Electrical load needs/requirements
- Energy Efficiency
- Climate Change
- Cumulative impacts related to the need for increased electrical delivery
- The potential need to relocate and or remove any SMUD infrastructure that may be affected in or around the project area

SMUD would like to be involved with discussing the above areas of interest as well as discussing any other potential issues. We aim to be partners in the efficient and sustainable delivery of the proposed Project. Please ensure that the information included in this response is conveyed to the Project planners and the appropriate Project proponents.

Environmental leadership is a core value of SMUD, and we look forward to collaborating with you on this Project. Again, we appreciate the opportunity to provide input on this NOP. If you have any questions regarding this letter, please do not hesitate to contact me at 916.732.6775, or by email at [Amy.Spitzer@smud.org](mailto:Amy.Spitzer@smud.org).

Sincerely,

A handwritten signature in blue ink, appearing to read "Amy Spitzer".

**RE: Notice of Preparation of an Environmental Impact Report for the City of Elk Grove  
2021 Housing Element Update**

Dear Mr. Jordan,

Thank you for providing an opportunity for the Sacramento Metropolitan Air Quality Management District (Sac Metro Air District) to review and comment on the Notice of Preparation (NOP) of an Environmental Impact Report (EIR) for the City of Elk Grove 2021 Housing Element Update (HEU). As described in the NOP, the purpose of the 2021 Housing Element Update is to establish parameters for future residential development and provide opportunities for purposeful expansion that are aligned with community desires, as well as regional growth objectives and State law. The 2021 Housing Element Update will address any changes that have occurred since the adoption of the current Housing Element and will include a map of available housing sites that would be updated to identify sites that could accommodate the City's Regional Housing Needs Assessment (RHNA) for the 2021–2029 planning period. The City would also amend the General Plan land use designations and rezone sites in the City to accommodate the changes specified in the HEU. Sac Metro Air District staff comments on the HEU and the HEU NOP follow.

**1. General Resources:**

Sac Metro Air District provides the *Guide to Air Quality Assessment in Sacramento County* which includes thresholds of significance, calculation methodologies and recommended mitigation for California Environmental Quality Act (CEQA) analysis. The document is available on the Sac Metro Air District website.<sup>1</sup>

**2. Consistency with Existing Plans**

The HEU EIR should evaluate consistency with existing plans, especially those that reduce criteria air pollutants and greenhouse gases. Such plans include, but are not limited to, the Metropolitan Transportation Plan/Sustainable Communities Strategy

---

<sup>1</sup> <http://www.airquality.org/Businesses/CEQA-Land-Use-Planning/CEQA-Guidance-Tools>, Sac Metro Air District, April 2020.

(MTP/SCS)<sup>2</sup>, Elk Grove's Comprehensive Operational Analysis (COA) service scenarios for e-tran, Elk Grove's Climate Action Plan, and Elk Grove's Bike, Pedestrian and Trails Master Plan.

### 3. Locating Sensitive Receptors Near Sources of Air Toxics

The HEU EIR should evaluate exposure reduction measures to reduce sensitive receptors to air pollution near major roadways and railways. In April 2017, the California Air Resources Board (CARB) released the technical advisory *Strategies to Reduce Air Pollution Exposure Near High-Volume Roadways*<sup>3</sup> to supplement the 2005 *Air Quality and Land Use Handbook: A Community Health Perspective*<sup>4</sup> CARB's handbook and technical advisory, and the Sac Metro Air District's *Mobile Sources Air Toxics Protocol*<sup>5</sup> can be used to:

- a. disclose the potential cancer risk to receptors located near major roadways and;
- b. choose exposure reduction measures, such as MERV 13 filters in residential units and installing a vegetative barrier between major roadways and residences.

Additionally, the Sac Metro Air District, in cooperation with the Sacramento Tree Foundation developed the *Landscaping Guidance for Improving Air Quality near Roadways*<sup>6</sup> to provide local guidance and best practices for installing vegetative barriers between major roadways and sensitive receptors. The Sac Metro Air District recommends the HEU include requirements for vegetative barriers between new housing and major roadways.

### 4. Transit-Oriented Development

The HEU EIR should evaluate the impact of the plan on planned light rail or Bus Rapid Transit (BRT) along Bruceville Road and other major corridors within the City of Elk Grove. The HEU should identify in a narrative statement and on a map any sites where average residential density will be reduced (downzoned) from the current (2013-2021) plan. The HEU should also identify in a narrative statement and on a map any sites where affordable housing is being downzoned or removed. Sac Metro Air District staff encourages the City to maximize density near locations with existing or planned transit service, especially near the site of the future Valley Rail train station.

Sac Metro Air District staff also recommends that City of Elk Grove staff consider including recommendations from Sacramento Regional Transit's transit-oriented development guidance for local governments that align supportive land-use policies with current and future low carbon transportation investments.<sup>7</sup>

ID	Start time	Completion time	Email	Name	Please enter your name.	Please enter your email address.	Please enter any additional contact information you would like to provide (e.g., mailing address).	Please enter your comments on the Notice of Preparation, or any other comments regarding the preparation of the EIR for the Housing Element Update.
3	6/22/20 14:34:01	6/22/20 14:37:33	anonymous		Roberta Larson	4rolarson@comcast.net	PN064-0080-860-0000	I own the above 16 acres and I have it up for sale! It is in the FLORIN VINEYARD GAP Planning area for Affordable Living - If you are interested or know anyone to BUY this property please email me and I will have my Agent contact you! Thanks
4	7/20/20 14:40:04	7/20/20 15:15:51	anonymous		Lynn Wheat	Wheat91@yahoo.com		<p>Thank you for the opportunity to submit comments on the NOP for the Housing Element Update.</p> <p>1) Page 4 has mislabeled the general location of site C-16.</p> <p>2) Site C-15: currently has an application with the City for a gas station and storage facility. This needs to be addressed in the document or the site needs to be removed from consideration.</p> <p>3) Site C-6: An application for low-density residential was received by the city. Please discuss or remove as a site to consider.</p> <p>Noise and Vibration: Please consider past projects in Elk Grove have poorly addressed noise and vibration by measuring sound with windows and doors closed. Elk Grove has the benefit of natural cooling in the Summer season with the Delta Breezes. Closed windows and doors should not be an appropriate mitigation measure allowed.</p> <p>Site C-3 will be surrounding a Quick Quack Car wash and along a busy roadway. Please assess noise and vibration with "windows" and "doors" open.</p> <p>Hydrology and Water Quality: Please include the groundwater sustainability plan in evaluating water availability.</p> <p>Safety element: Please include an evaluation of bicyclist and pedestrian accidents and roadway conditions. Please include access to public transportation and site development of the bus stop. Many bus stops in our city do not have turnouts, benches or covering.</p>

#### Architectural Coating

Interior Paint VOC content:	100
Exterior Paint VOC content:	100

#### Non-Residential Architectural Coating

Percentage of Buildings' Interior Painted:	100%
Percentage of Buildings' Exterior Painted:	100%

Structure Type	Land Use Square Feet	CalEEMod Application Factor	Total Paintable		
			Surface Area <sup>1</sup>	Paintable Interior Area <sup>2</sup>	Paintable Exterior Area <sup>2</sup>
<b>Non-Residential</b>					
Residential	5,761,000	2.0	11,522,000	8,641,500	2,880,500

<sup>1</sup> CalEEMod methodology calculates the paintable interior and exterior areas by multiplying the total paintable surface area by 75 and 25 percent, respectively.

<sup>2</sup> The program assumes the total surface for painting equals 2.7 times the floor square footage for residential and 2 times that for nonresidential square footage defined by the user. Architectural coatings for the parking lot is based on CalEEMod methodology applied to a surface parking lot (i.e., striping), in which 6% of surface area is painted.

Elk Grove Housing Element Construction + Operation Emissions - Sacramento County, Annual

**Elk Grove Housing Element Construction + Operation Emissions**  
**Sacramento County, Annual**

**1.0 Project Characteristics**

**1.1 Land Usage**

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Apartments High Rise	3,243.00	Dwelling Unit	139.43	3,243,000.00	8659
Apartments Low Rise	551.00	Dwelling Unit	30.38	551,000.00	1471
Apartments Mid Rise	1,967.00	Dwelling Unit	91.64	1,967,000.00	5252

**1.2 Other Project Characteristics**

<b>Urbanization</b>	Urban	<b>Wind Speed (m/s)</b>	3.5	<b>Precipitation Freq (Days)</b>	58
<b>Climate Zone</b>	6			<b>Operational Year</b>	2030
<b>Utility Company</b>	Sacramento Municipal Utility District				
<b>CO2 Intensity (lb/MW hr)</b>	590.31	<b>CH4 Intensity (lb/MW hr)</b>	0.029	<b>N2O Intensity (lb/MW hr)</b>	0.006

**1.3 User Entered Comments & Non-Default Data**

Elk Grove Housing Element Construction + Operation Emissions - Sacramento County, Annual

Project Characteristics - Emissions estimates for Elk Grove Housing Element Update (2021-2029).

Land Use - 261 acres of disturbed land + 5,761 DUs

Construction Phase - Construction to occur from 2021-2029. CalEEMod default ratios utilized.

Off-road Equipment - CalEEMod Defaults Used

Trips and VMT - No project specific information available

Demolition - No project specific information available

Grading - No project specific information available

Architectural Coating - Consistent with SMAQMD's Rule 422

Vehicle Trips - Values adjusted to adhere to Traffic Study

Energy Use - Adjusted to reflect consistency with 2019 California Energy Code

Water And Wastewater - Defaults used

Solid Waste - Defaults Used

Elk Grove Housing Element Construction + Operation Emissions - Sacramento County, Summer

Project Characteristics - Emissions estimates for Elk Grove Housing Element Update (2021-2029).

Land Use - 261 acres of disturbed land + 5,761 DUs

Construction Phase - Construction to occur from 2021-2029. CalEEMod default ratios utilized.

Off-road Equipment - CalEEMod Defaults Used

Trips and VMT - No project specific information available

Demolition - No project specific information available

Grading - No project specific information available

Architectural Coating - Consistent with SMAQMD's Rule 422

Vehicle Trips - Values adjusted to adhere to Traffic Study

Energy Use - Adjusted to reflect consistency with 2019 California Energy Code

Water And Wastewater - Defaults used

Solid Waste - Defaults Used

<b>Mortality</b>					
Mortality, Non-Accidental	0 - 99	0.11	0.090	0.00029%	30386

1. Affected age ranges are shown. Other age ranges are available, but the endpoints and age ranges shown here are the ones used by the USEPA in their health assessments. The age ranges are consistent with the epidemiological study that is the basis of the health function.
  2. Health effects are shown in terms of incidences of each health endpoint and how it compares to the base (2035 base year health effect incidences, or "background health incidence") values. Health effects are shown for the Reduced Sacramento 4-km Modeling Domain and the 5-Air-District Region.
  3. The percent of background health incidence uses the mean incidence. The background health incidence is an estimate of the average number of people that are affected by the health endpoint in a given population over a given period of time. In this case, the background incidence rates cover the 5-Air-District Region (estimated 2035 population of 3,271,451 persons). Health incidence rates and other health data are typically collected by the government as well as the World Health Organization. The background incidence rates used here are obtained from BenMAP.
  4. The total number of health incidences across the 5-Air-District Region is calculated based on the modeling data. The information is presented to assist in providing overall health context.
  5. The technical specifications and map for the Reduced Sacramento 4-km Modeling Domain are included in Appendix A, Table A-1 and Appendix B, Figure B-2 of the *Guidance to Address the Friant Ranch Ruling for CEQA Projects in the Sac Metro Air District*.
- Sac Metro Air District Strategic Area Project Health Effects Tool, version 2, published September 2020**

Fehr & Peers VMT Memo

## MEMORANDUM

Date: January 15, 2021  
 To: Cori Resha, Ascent  
 From: David B. Robinson, Fehr & Peers  
**Subject: Elk Grove Housing Element Update VMT Analysis**

RS20-3929

Fehr & Peers completed a vehicle miles of travel (VMT) analysis to support the update to the City of Elk Grove Housing Element. The update to the Housing Element is necessary to demonstrate that the City can accommodate its Regional Housing Needs Allocation (RHNA). Specifically, the City must identify locations where 4,265 Low and Very Low-Income housing units can be built and the policies and strategies necessary to meet the City’s housing needs.

This memorandum describes the City’s RHNA, existing and candidate locations, the analysis methodology, the evaluation criteria, and presents the analysis results.

### RHNA and Candidate Locations

**Table 1** compares the City of Elk Grove RHNA to the SACOG region. As shown, the City’s total RHNA is 8,263 dwellings with 51.6% in the Low and Very Low-Income categories, which is the bases of the analysis. Analysis of the Moderate and Above-moderate income categories is not required. The City of Elk Grove’s total allocation represents 5.4 % of the SACOG region and 6.8% of the lower income units. **Figure 1** shows existing and candidate locations that can accommodate the lower income units.

**Table 1: Land Use Comparison**

Jurisdiction	Lower Income Units				Higher Income Units		Total RHNA
	Very Low	Low	Very Low + Low	% of Total RHNA	Moderate	Above Moderate	
Elk Grove	2,661	1,604	4,265	51.6%	1,186	2,812	8,263
SACOG Region	38,999	23,503	62,502	40.7%	26,993	64,017	153,512
Elk Grove’s Share of SACOG Region	6.8%	6.8%	6.8%	-	4.4%	4.4%	5.4%

Source: SACOG Regional Housing Needs Plan, Cycle 6 (2021-2029), Adopted March 2020.

## Analysis Methodology

We developed origin-destination/tour-based transportation analysis VMT forecasts, using the modified version of SACOG's SACSIM regional travel demand forecasting model, developed for the City of Elk Grove General Plan Update and subsequently updated for clarity. Due to uncertainty on the exact location of where development will occur, we tested four scenarios that varied the amount and location of RHNA dwelling units allocated to the existing and candidate sites shown on **Figure 1**. This approach was applied to identify a worst case VMT scenario for analysis. **Tables 2 through 5** summarizes the allocation assumptions for the four analyzed scenarios, which are briefly described below:

- Scenario 1 – Applies existing zoning on the existing sites and rezones all candidate sites.
- Scenario 2 – Applies up-zoning on some existing sites and rezones all of the candidate sites.
- Scenario 3 – Applies existing zoning on the existing sites, rezones/includes sites furthest out from the core.
- Scenario 4 – Applies up-zoning on some existing sites and rezones on some candidate sites.

Buffer Achieved	Dwelling Units	1,538	1,877	96	424
	Percent of RHNA	136%	144%	102%	110%

Source: SACOG Regional Housing Needs Plan, Cycle 6 (2021-2029), Adopted March 2020.

The City uses total daily VMT and VMT per service population as the basis for VMT analysis. The following describes these two VMT metrics and their intended use:

- VMT per Service Population – Includes the sum of all vehicle miles of travel produced by individual land uses in a project, divide by the sum of total residents living in the project. The VMT per service population metric is used to assess a project against specific land use VMT limits. The Project includes multi-family residential land use. Therefore, the Project is compared to the high density residential VMT limit.
- Total Daily VMT – Includes the sum of all daily vehicle miles of travel produced by all uses within the City of applicable Study Area. Since the Project is located in the City limits, the Citywide cumulative VMT limit that is outlined in Policy MOB-1-1(a)(ii) is used to assess the Project.

The VMT estimates include all trips that have one end in a project location and includes the following:

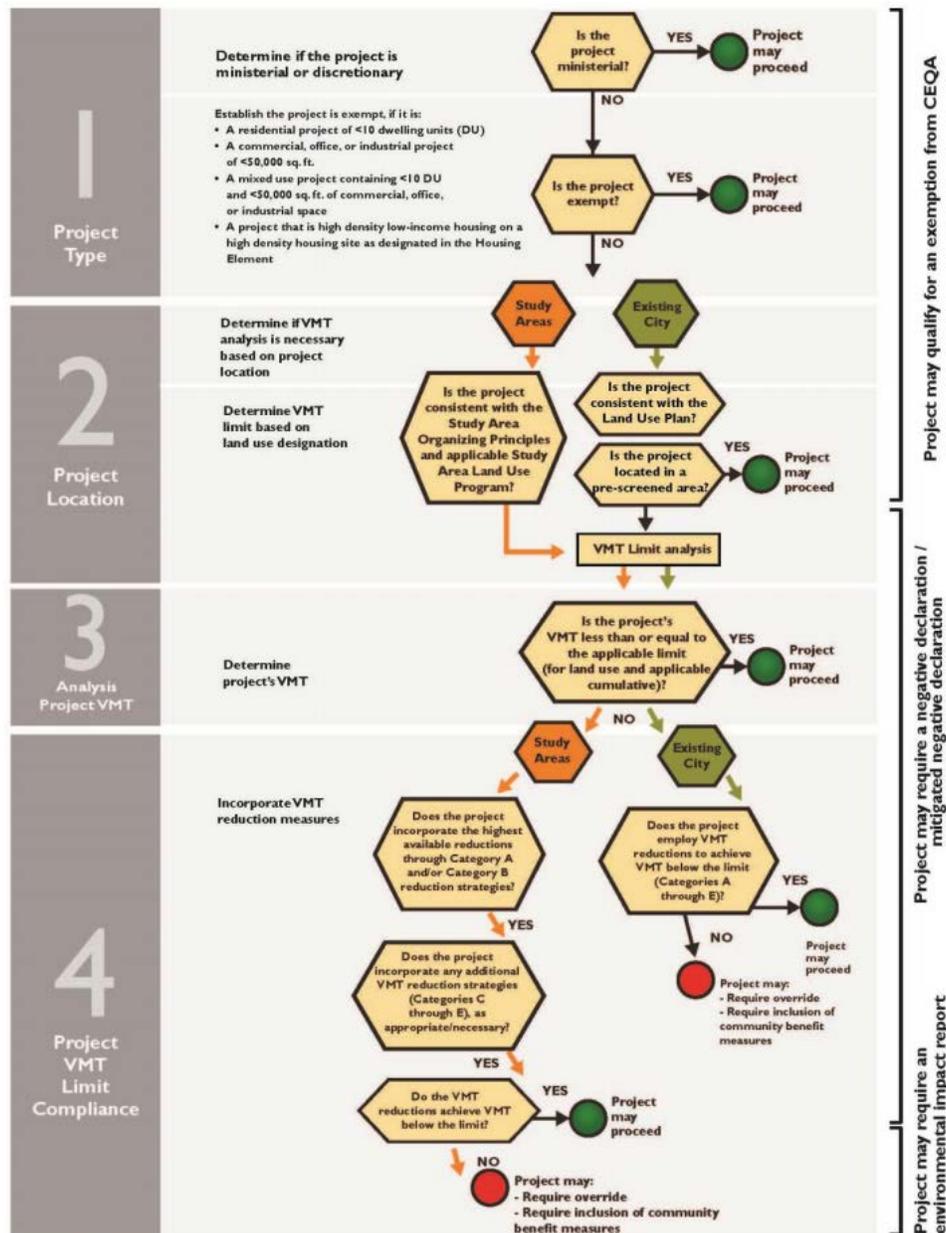

- Trip Types – Includes internal-to-internal (II), internal-to-external (IX), and external-to-internal (XI) trips. External-to-external (XX) trips are excluded.
- Trip Length – Fully accounts for entire length of each trip.
- Trip Tours – Includes trip tours without an origin or destination at the home.

Details of the VMT calculation process are included in Appendix E of the City of Elk Grove Transportation Analysis Guidelines.

### **Analysis Evaluation Criteria**

The following evaluation criteria was used to determine if the addition of the proposed Project would result in an impact in the City of Elk Grove.

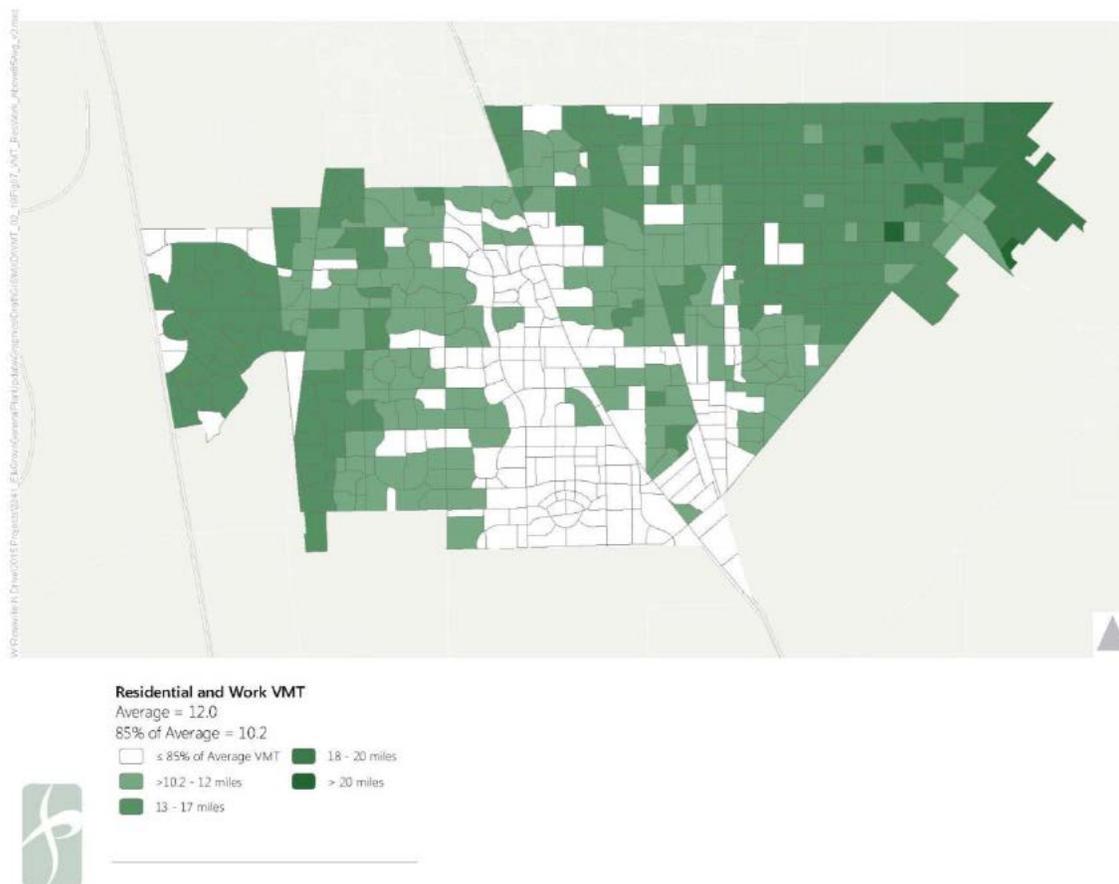

The City desires to achieve a reduction in VMT. Reductions in VMT can be accomplished through a combination of land use and mobility actions. To reduce VMT, the City has established the following metrics and limits depicted in the following graphic.

The VMT analysis process for land use projects outlined above includes the following four steps:

- Step 1 (Project Type) – Determine if the project is ministerial or discretionary or if the project is exempt from VMT analysis.
- Step 2 (Project Location) – Determine if VMT analysis is necessary based on project location and determine the Project’s VMT limit by land use designation.
- Step 3 (Analyze Project VMT) – Determine the Project’s VMT and compare to the VMT limit by land use designation (from Step 2) to determine if VMT mitigation is necessary.
- Step 4 (Project VMT Limit Compliance) – Identify VMT reduction mitigation measures and significance of VMT impacts with mitigation.

The following VMT Screening Map identifies areas in the City that are exempt from VMT analysis. These include sites that have been pre-screened through Citywide VMT analysis. Pre-screened areas are shown in white and have been determined to result in 15 percent or below the average service population VMT established for that land use designation if built to the specifications of the Land Use Plan. With an average VMT per service population of 12.0, the City's target VMT per service population threshold is 10.2.

For projects that have not been pre-screened and that do not achieve the limits outlined below shall be subject to all feasible mitigation measures necessary to reduce the VMT for, or induced by, the Project to the applicable limits. If the VMT for or induced by the Project cannot be reduced consistent with the performance metrics outlined below, the City may consider approval of the Project, subject to a finding of overriding consideration and mitigation of transportation impacts to the extent feasible, provided some other form of community benefit is achieved by the Project.

- **New Development** – Any new land use plans, amendments to such plans, and other discretionary development proposals (referred to as “development projects”) are required to demonstrate a 15 percent reduction in VMT from existing (2015) conditions. To demonstrate this reduction, conformance with following land use and cumulative VMT limits is required:
  1. **Land Use** – Development projects shall demonstrate that the VMT produced by the project at buildout is equal to or less than the VMT limit of the project’s General Plan land use

designation, as shown in the following table, which incorporates the 15 percent reduction from 2015 conditions:

**Vehicle Miles Traveled Limits by Land Use Designation**

<b>Land Use Designation</b>	<b>VMT Limit (daily per service population)</b>
<b>Commercial and Employment Land Use Designations</b>	
Community Commercial	41.6
Regional Commercial	44.3
Employment Center	47.1
Light Industrial/Flex	24.5
Light Industrial	24.5
Heavy Industrial	39.5
<b>Mixed Use Land Use Designations</b>	
Village Center Mixed Use	41.6
Residential Mixed Use	21.2
<b>Public/Quasi Public and Open Space Land Use Designations</b>	
Parks and Open Space <sup>1</sup>	0.0
Resource Management and Conservation <sup>1</sup>	0.0
Public Services	53.1
<b>Residential Land Use Designations</b>	
Rural Residential	34.7
Estate Residential	49.2
Low Density Residential	21.2
Medium Density Residential	20.9
High Density Residential	20.6
<b>Other Land Use Designations</b>	
Agriculture	34.7

*Notes:*

1. *These land use designations are not anticipated to produce substantial VMT, as they have no residents and few to no employees. These land use designations therefore have no limit and are exempt from analysis.*

2. Cumulative for Development Projects within the Existing City – Development projects located within the existing (2017) City limits shall demonstrate that cumulative VMT within the City including the project would be equal to or less than the established Citywide limit of 6,367,833 VMT (total daily VMT).
3. Cumulative for Development Projects within Growth Areas – Development projects located in Study Areas shall demonstrate that cumulative VMT within the applicable Study Area would be equal to or less than the established limit shown in the following table.

**Study Area Total Vehicle Miles Traveled Limits**

Study Area	VMT Limit (total VMT at buildout)
North Study Area	37,622
East Study Area	420,612
South Study Area	1,311,107
West Study Area	705,243

The Project is located within the City limits. The Project and remainder of the City will meet the buildout VMT Limit 6,367,833.

**Analysis Results**

The Project VMT analysis under cumulative conditions, relative to the threshold of significance presented above, is discussed below. The VMT analysis includes all the roadway improvements included as part of the General Plan VMT analysis.

VMT Screening

The VMT Screening Map identifies areas in the City that are exempt from VMT analysis. These include sites that have been pre-screened through Citywide VMT analysis. Pre-screened areas have been determined to result in 15 percent or below the average service population VMT established for the land use designations for the study area if built to the specifications of the Land Use Plan.

The Project would be implemented on sites throughout the City that fall within and outside of the pre-screened areas. In addition, the Project would require a general plan amendment to change some land use designations. Therefore, the Project is not eligible for pre-screening.

**Impact**

General Plan Impact 5.13.2 identified that implementation of the General Plan would result in increased VMT that would be significant and unavoidable. Project-generated VMT per service population associated with housing sites under the Housing Element Update would not result in an exceedance of the City's VMT per service population threshold for the High Density Residential land use designation (i.e., 20.6 VMT). However, the addition of Project-generated total daily VMT within the City could result in an exceedance of the established Citywide limit of 6,367,833 VMT, depending on the amount and location of development sites selected by the Council. The Council could select sites that would result in the exceedance of the established Citywide limit that would require additional mitigation measures to reduce total daily VMT to a less than significant level. Therefore, implementation of the Project would result in a **significant and unavoidable** impact to VMT.

VMT Limits by Land Use Designation

As outlined above, the Project must demonstrate that the VMT produced by the Project at buildout is equal to or less than the VMT limit of the underlying land use designation. The Project will have a General Plan

land use designation of High Density Residential after the required general plan amendment outlined above. **Tables 7 through 10** summarize the VMT per service population for Scenarios 1 through 4, respectively, by potential development site and the average for each analysis scenario.

**Table 11: VMT by Land Use Designation Limits – Project Buildout Conditions by Analysis Scenario**

Land Use Designation	Scenario	VMT Per Service Population		Limit Exceeded?
		Scenario Buildout	Limit	
High Density Residential	1	19.3	20.6	No
	2	19.3		No
	3	19.8		No
	4	19.6		No

Source: Fehr & Peers, 2020.

**Table 11** compares the Project’s VMT per service population (i.e., residents) to the City’s VMT limit for High Density Residential land use (which incorporates a 15% reduction in total VMT from the 2015 baseline). The average VMT per service population for all potential development sites, for all four analysis scenarios, will perform better than the City’s VMT limit for the High Density Residential land use designation. However, as shown in **Tables 7 through 10**, some of the potential sites that make up the four development scenarios would perform worse than the City’s VMT per service population limit.

Citywide VMT Limits

As outlined above, land use development projects located with the existing (2019) City limits shall demonstrate that cumulative VMT within the City, including the Project, would be equal to or less than the City’s established total VMT limit. This VMT limit incorporates a 15% reduction in total VMT from the 2015 baseline. **Table 12** compares the citywide total VMT limit to the City’s total VMT limit with buildout of the four analysis scenarios. As shown in **Table 12**, the addition of the Project would increase cumulative VMT and would exceed the established citywide limit with most of the analysis scenarios except Scenario 3. Scenario 3 accommodates the RHNA allocation of Low and Very Low-Income units, but with the smallest buffer (only 2%).

**Table 12: Citywide VMT Limit – Project Buildout Conditions by Analysis Scenario**

Analysis Scenario	Total VMT		Limit Exceeded?
	Scenario Buildout	Limit	
1	6,430,455	6,367,833	Yes
2	6,446,861		Yes
3	6,366,369		No
4	6,379,826		Yes

### Citywide VMT Limits

As detailed above, Project-generated VMT per service population would not result in an exceedance of the VMT per service population threshold for the High Density Residential land use designation (i.e., 20.6 VMT). However, the increase of total daily VMT within the City resulting from implementation of the Project as a whole could result in an exceedance of the established Citywide limit of 6,367,833 VMT, depending on the sites selected by the Council. Therefore, implementation of the Project may result in substantially more severe VMT impacts than identified in the General Plan EIR.

### **Mitigation**

**Table 13** summarizes VMT reduction strategies to achieve daily values below the established limits, which are documented in the City of Elk Grove Transportation Analysis Guidelines<sup>1</sup>. The VMT reduction strategies are grouped into the following five categories:

- Category A – Land Use and Location
- Category B – Site Enhancement
- Category C – Transit System Improvements
- Category D – Commute Trip Reduction
- Category E – In-Lieu Fee

The range of potential VMT reduction is identified for each category, along with the cross-category maximum that is applicable when multiple strategies are applied in combination. Since the final list of sites is not known at this time, the application of Category E (In-Lieu Fee) is not feasible because a fee cannot be calculated.

Implementation of one of the following options would reduce total average daily VMT within the City:

- Option A: - Implement Category A strategies (see **Table 13**). The City Council shall develop a modified scenario that provides the RHNA allocation to Low and Very Low-Income categories of 4,265 dwelling units and achieves an average daily VMT within the City that is less than the Citywide limit of 6,367,833 VMT.

OR

- Option B: - Implement Category B through D strategies (see **Table 13**). Prior to design review, the project applicant shall prepare and submit a VMT Reduction Strategy Technical Memorandum to the satisfaction of the Public Works Director (i.e., or their designee) documenting Category B through D strategies to reduce the project's proportional share of average daily VMT within the City. The proportional share of VMT shall be calculated based on the final list of project sites selected by the City Council and be directly proportional to the relative VMT efficiency (i.e.,

---

<sup>1</sup> *Transportation Analysis Guidelines*, City of Elk Grove, Adopted February, and Updated December 2019.

measured by VMT per service population) of the proposed project site and the average VMT efficiency of all selected sites.

**Table 13: VMT Reduction Strategies**

Strategy Category		Description	Range of Potential VMT Reduction <sup>2</sup>	
			Category	Cross-Category
A	Land Use/ Location	Land use-related components such as project density, location, and efficiency related to other housing and jobs; and diversity of uses within the project. Also includes access and proximity to destinations, transit stations, and active transportation infrastructure.	Up to 21.3%	15% Maximum
B	Site Enhancement	Establishing or connecting to a pedestrian/bike network; traffic calming within and in proximity to the project; car sharing programs; shuttle programs.	Up to 5.7%	
C	Transit System Improvements <sup>1</sup>	Improvements to the transit system including reach expansion, service frequency, types of transit, access to stations, station safety and quality, parking (park-and-ride) and bike access (to transit itself and parking), last-mile connections.	Up to 10.5%	
D	Commute Trip Reduction <sup>1</sup>	<u>For Residential Sites:</u> transit fare subsidies, education/training of alternatives, rideshare programs, shuttle programs, bike share programs. <u>For Employment Sites:</u> transit fare subsidies, parking cash-outs, paid parking, alternative work schedules/telecommute, education/training of alternatives, rideshare programs, shuttle programs, bike share programs, end of trip facilities.	Up to 30.0%	
E	In-Lieu fee	A fee is levied that is used to provide non-vehicular transportation services that connect project residents to areas of employment or vice versa. This service may be provided by the project applicant in corporation with major employers.	Up to 10.5%	

<sup>1</sup>Can be achieved through TDM program measures.

<sup>2</sup>

Source: Fehr & Peers, 2020.

Implementation of this mitigation would reduce total daily VMT. However, because the Council has not selected the final list of development sites and because an individual site may not be able to achieve its required reduction in total daily VMT within the City, the impact would remain **significant and unavoidable**.
